<Reference> Application of new accounting standards (IFRS 16)

1. Application of new lease accounting standards

Since J. Front Retailing Group (the “Group”) has voluntarily applied IFRS since the first three months of the fiscal year ended February 28, 2018 (March 31, 2017), the Group is required to apply the new lease accounting standards from the first three months of the fiscal year ending February 29, 2020 (March 1, 2019).

2. Overview of the new lease accounting standards

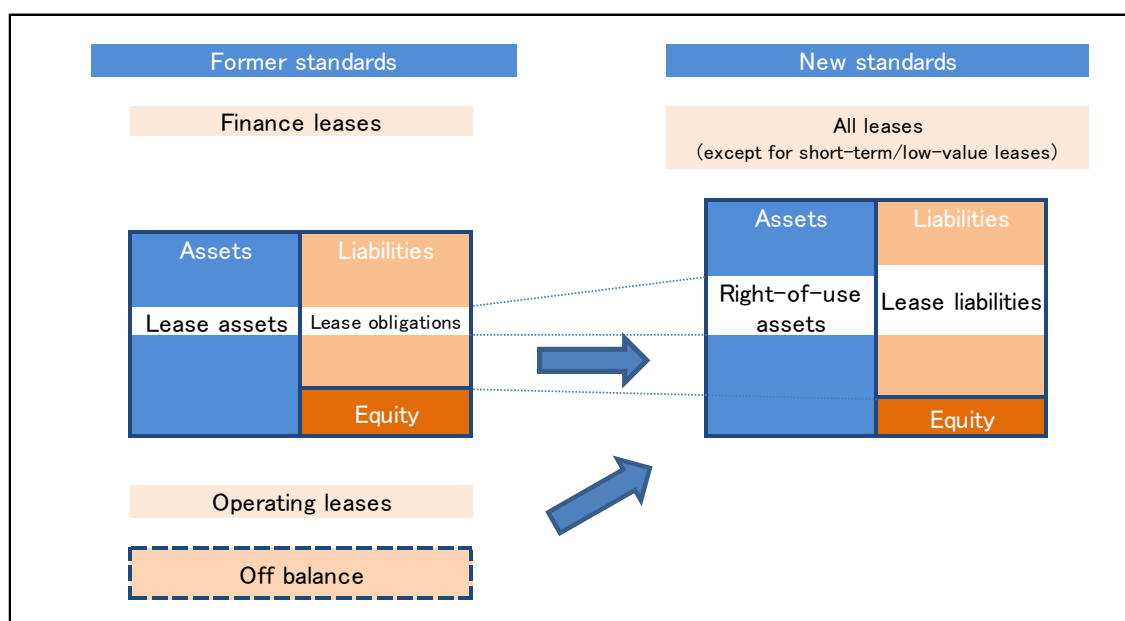

(1) Under the new lease accounting standards, all lease transactions for lessees are recognized as the acquisition of assets accompanied by funding. Accordingly, the former lease classification is eliminated and a single accounting model is adopted (except for short-term/low-value leases).

Classification	Former standards			New standards		
	BS	PL	CF	BS	PL	CF
Finance leases	On balance	Depreciation Interest expenses	Operating/ Financing	On balance	Depreciation Interest expenses	Operating/ Financing
Operating leases	Off balance	Rent expenses	Operating			

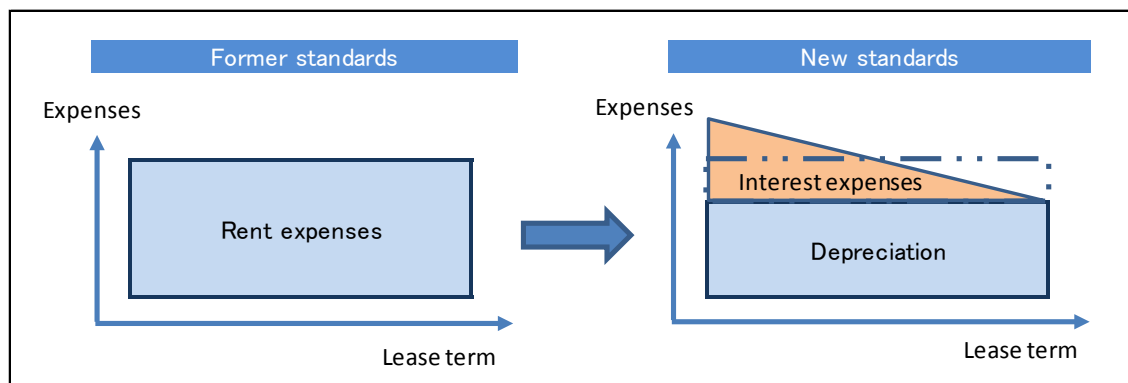

(2) We recognize right-of-use assets and lease liabilities for all lease transactions for lessees on the day of application of the new lease accounting standards. Accordingly, recognized values of assets and liabilities increase compared to the former standards.

(Lease assets and lease obligations, which were recognized as finance lease transactions, are recognized under different titles.)

(3) The differences recognized in assets and liabilities, etc., which arise from the differences in the way to calculate right-of-use assets and lease liabilities, are subtracted from equity (retained earnings, etc.).

- (4) We recognize depreciation of right-of-use assets (fixed amount) and interest expenses on lease liabilities during the lease terms on and after the day of application of the new lease accounting standards. (Rent expenses recognized under the former standards are not reported.)
- (5) The total amount of rent expenses recognized over the lease terms under the former standards equals the sum of depreciation and rent expenses recognized under the new standards.
- (6) Since interest expenses are higher earlier in the lease terms when the principal of liabilities is larger and they decline as the lease terms go on, the impact on profit before tax varies from fiscal year to fiscal year.

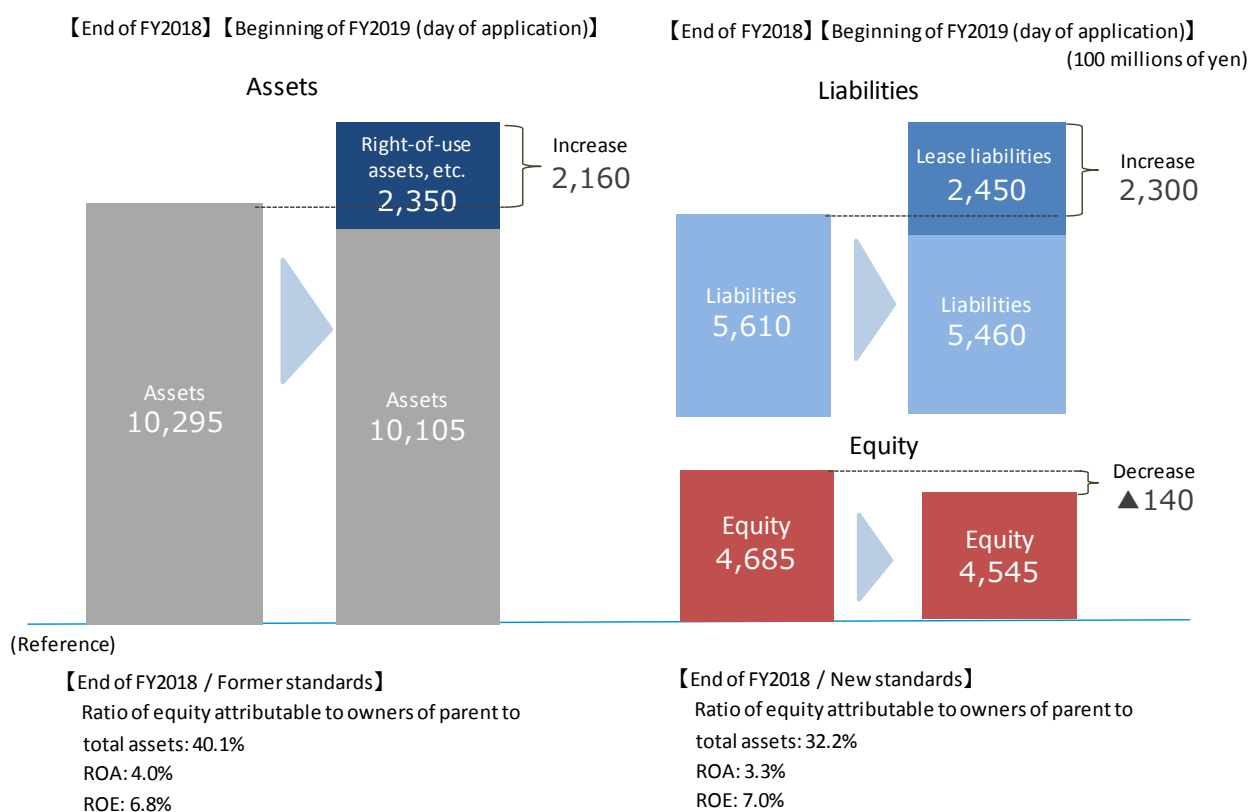

- (7) The classification of cash flows changes due to changes in accounting treatment. There is no impact on net increase/decrease in cash and cash equivalents.

3. Impact on J. Front Retailing's financial statements

(1) Consolidated statement of financial position

Assets (right-of-use assets, etc.) and liabilities (lease liabilities) increase and equity (retained earnings, etc.) decreases at the beginning of fiscal year 2019 (the day of application).

The ratio of equity attributable to owners of parent to total assets and ROA decrease but ROE increases compared to recognition under the former standards.

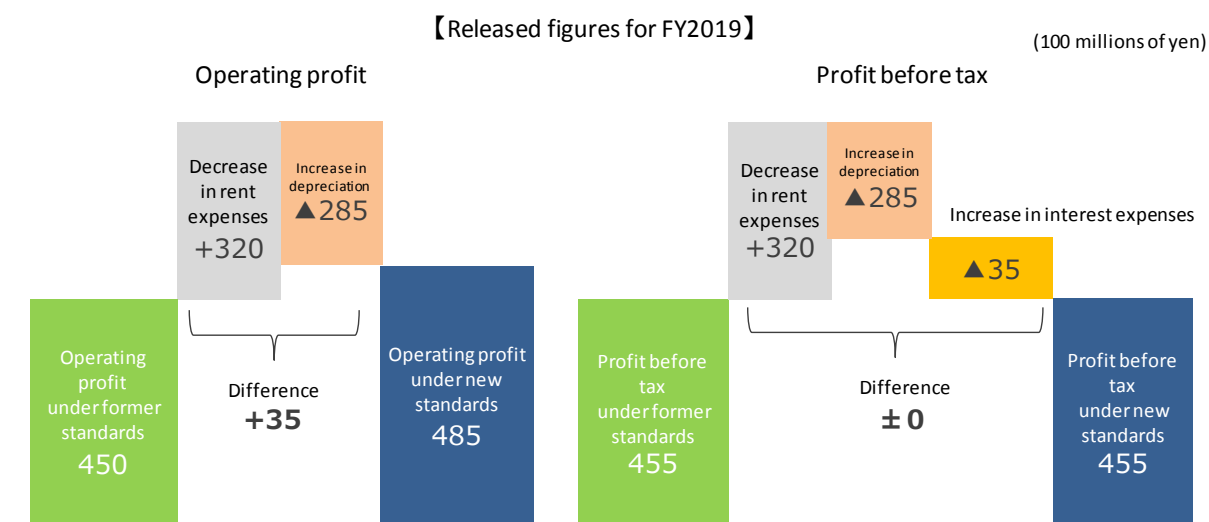

Figures at the beginning of FY2019 are approximations and may change in the future.

(2) Consolidated statement of profit or loss

Operating profit increases under the new standards because cost of sales and selling, general and administrative expenses decrease by the amount of difference between rent expenses recognized under the former standards and newly recognized depreciation.

The impact on profit before tax in fiscal year 2019 is immaterial because interest expenses on lease liabilities are recognized.

(3) Consolidated statement of cash flows

Cash flows from operating activities increase and cash flows from financing activities decrease because rent expenses recognized under the former standards are treated as repayments of lease liabilities and interest expenses.
