Integrated Report 2018

Aiming for “Multi Service Retailer”

Create and Bring to Life “New Happiness.”

J. FRONT RETAILING
Editorial policy:

J. Front Retailing Group (the “Group”) issued this integrated report in order to provide a deeper understanding of what actions it takes to change its business portfolio for sustainable growth of corporate value. The report explains at the beginning the values, vision, value creation process and business model of J. Front Retailing (the “Company”) and it contains non-financial information including the Group’s involvement in society and the environment through business activities and governance system that helps enhance corporate value in addition to financial information based on specific management strategy. We have referred to the “International Integrated Reporting Framework” established by the International Integrated Reporting Council (IIRC) and the “Guidance for Collaborative Value Creation” established by the Ministry of Economy, Trade and Industry to create this report.

Timeframe:

This report mainly reviews the fiscal year 2017 (March 1, 2017 through February 28, 2018) but it also contains the latest information available at the time of issue to the extent possible.

Scope:

J. Front Retailing Co., Ltd. and consolidated subsidiaries

Cautionary statement regarding forward-looking statements:

Forward-looking statements in this integrated report represent our assumptions based on information currently available to us and inherently involve potential risks, uncertainties and other factors. Therefore, actual results may differ materially from the results anticipated herein due to changes in various factors.

Service before Profit – This phrase is from a passage from “Of Honor and Disgrace” written by Xunzi, a Chinese thinker in the Zhanguo period. “Those who give priority to service over profit will prosper.” The most important thing is to approach things with sincerity and good faith. “Do not sell any products that are of no benefit to customers.” “Do not rank customers.” “Honesty and loving-kindness come first.” “An unfaithful person is useless regardless of how gifted he/she may be.” Thus Daimaru has told its employees to keep a humble attitude to serve customers. At Matsuzakaya, the spirit of “Abjure all evil and practice all good” has been valued. They can be modernized as “Customer-first principle” and “Contribution to society.” Thinking of stakeholders thoroughly and acting accordingly will lead to business growth. We believe “Creating Shared Value (CSV)” to solve social issues through business activities is nothing less than practicing the Group’s corporate credo simply and honestly.
Group Mission Statement

We aim at providing high quality products and services that meet the changing times and satisfying customers beyond their expectations.

We aim at developing the Group by contributing to society at large as a fair and reliable corporation.
Now is the time when lifestyles are changing speedily. To meet these changes quickly, and what is more, to find budding needs are J. Front Retailing’s important missions. More women’s social advancement. Changing lifestyles due to falling birthrate and aging population. Increasing globalization and digital consumption. Various factors bring you more new ways to enjoy your life as well as triggering concerns and stresses. Seeing both these “positive and negative” factors, we will evolve into a group that can serve you in all aspects of life. With regard to “enjoyment,” we will not only “sell goods” but create new events and experiences to excite you. With regard to “concerns,” we will cover “shortfall” such as “busyness,” “uneasiness” and “hassle” and create services to clear the fog in your mind. Our domain will expand beyond the framework of “retail.” And there should be creative ideas, or the creation of “new happiness.” Now is the time for J. Front Retailing to drastically change. And we promise you to closely support your life in a “present progressive form” after 10 years and even 100 years by “changing all the time.”
Story behind the development of the Vision

J. Front Retailing Group was formed through the management integration of The Daimaru, Inc. and Matsuzakaya Holdings Co., Ltd. in September 2007, and with the vision of “establishing ourselves as a leading Japanese retail company both in terms of quality and quantity with the Department Store Business as its core,” we implemented various initiatives to become a multifaceted retailer. In the core Department Store Business, we deepened the establishment of new department store model as well as expanding our customer base. Furthermore, we have steadily expanded our business areas other than the Department Store Business through aggressive M&A including the conversion of StylingLife Holdings Inc. (SLH) into an associate accounted for using equity method in 2011 and the conversion of Parco Co., Ltd. into a consolidated subsidiary in 2012.

In the meantime, the business environment is greatly changing. We expect “lifestyles” to be increasingly “diversified” due to falling birthrate and aging population and changing family dynamics and the “means of seeking enjoyment” are also expected to grow increasingly “diverse” due to shift from product-based consumption to experience-based consumption and the evolution of ICT. That is to say, as it is difficult to grow just by continuing the current business model as it is, we see the present time as a turning point to drastically alter the course of the Group’s management.

In these circumstances, considering what makes people happy and strategically expanding business fields and transforming existing businesses to provide new forms of value with respect to “lifestyles” and “means of seeking enjoyment,” we developed the new Group Vision “Create and Bring to Life ‘New Happiness.’” with the aim of becoming a business group which contributes to realizing spiritually affluent lifestyles.

By showing the future directions to aim for with this Group Vision, we aim to greatly change the Group and realize discontinuous growth.

New cause assumed by the Group

The main business of the Group was the offering of products and services mainly for “festive occasions” by the core businesses including department store chains Daimaru and Matsuzakaya and Parco to meet customer needs. With increasingly diversified lifestyles, however, customer needs are seen not just on festive occasions but also widely in daily life. By relieving customers of “concerns” and “frustrations” in daily life so that they can live more conveniently and more comfortably, we hope many customers will be able to spare more time for festive occasions. I think that is the social role we will have to fill, i.e., the cause.

In fact, as the means of seeking enjoyment are diversified, many customers cannot gain sufficient satisfaction from a stereotypical form of consumption as in the past. Consumers “want new and different experiences” or “want to enjoy with like-minded people.” Thus the focus of consumption is shifting to experiences. Another recent big trend is heightened awareness of social contribution. People “want to care more about the environment and ethics” and “want to feel that their own existence is meaningful in society.” The Group has to be able to offer something more enjoyable and more exciting in response to such diversification of the means of seeking enjoyment.

Dissemination of the Vision to drive specific actions

The Vision shows where we and the Company want to be in the future and helps clarify the organization’s strategy, direction and decision-making process. It is each and every employee who will realize the Vision in a concrete manner and the sum of their performance will constitute our corporate value. That is, we think the key will be how we will drive the specific actions of individual employees while disseminating the Vision in each site and offering directions.

To this end, firstly, the top management explained their thoughts put into the Vision in person to employees and had interactive dialogues. In the next step, all employees including people in the Executive Officer and higher management positions made pledges for actions toward the realization of the Vision via the Company magazines and intranet website. As initiatives to drive specific actions based on these pledges, we have created the “Challenge Card” program in which all employees can participate via the personnel system. Thus we have introduced a company-wide system that assesses the ideas and inspirations of individual employees and teams and helps realize them. And with regard to “creation” ideas with potential to expand, the Company provides an opportunity called “Creation Award” in which creators present their ideas in person to share company-wide the ideas themselves and information on the process to address them. We allow all employees to try to increase their motivation.

We will have the “creative nature” take root as our true corporate culture. – The Group’s grand challenge has started.
We Will Respond to Changes and Commit Ourselves to “Creating Shared Value” in a Timeless Way.

YAMAMOTO Ryoichi
Director, President and Representative Executive Officer
J. Front Retailing Co., Ltd.

Kimono dealers, which originated in the Edo period, dramatically transformed themselves into department stores more than 100 years ago in response to changing times. Thus founded Daimaru and Matsuzakaya in the Group have achieved sustainable development over 300 and 400 years, respectively, because they have always grasped changes of the times accurately, have thought through what are values for society and for customers, and have been engaged in business activities simply and honestly following their corporate credos.

I recognize the environment surrounding our business is currently facing a “greater turning point” than these times and changing at a breakneck speed. The evolution of AI and robots has automated tasks and operations. And I feel the digital society where IoT connects everything to the Internet has been rapidly becoming familiar to us over the past year. I realize it is radically changing lifestyles and industrial systems.

As it is said to be the “era of 100-year life expectancy,” longevity is expected to be further extended. In the meantime, according to a study, the population in Japan is projected to be below 90 million 50 years later and decrease by half 100 years later. Actually, a dramatic change in the social structure that we have never experienced before is drawing near.

In addition, consumption is shifting from goods to services and experiences and the focus is shifting from retail to services. Therefore, the Group whose main business is retail such as department stores needs to change its business structure beyond the framework of retail in order to continue to create new value beyond customers’ expectations and further develop.

Under the new Group Vision “Create and Bring to Life ‘New Happiness’” and the current Medium-term Business Plan, the Company drastically altered the course of the management toward “discontinuous growth,” which is not an extension of the present. In the process, while respecting the values that do not change over time, we will accurately capture changes in the times and the business environment and firmly capture both positive and negative risks to change into a new socially indispensable business group that combines tradition and innovation.

To this end, it is essential to change our mindset and working styles. Instead of being bound by our past successful experiences and familiar approaches, we will facilitate deeper communication inside and outside the Company and actively incorporate different cultures and thinking to “combine different elements,” which will lead to new achievements using diversity.

With the aim of developing as a “Multi Service Retailer” beyond the retail framework, we will create both “social value” and “economic value” and drastically change our business portfolio to ensure sustainable growth and increase corporate value over the medium to long term.

October 2012
Phase II expansion and opening of Daimaru Tokyo store

Integrated Report 2018 | 09
J. Front Retailing
Value Creation Process

Under the Basic Mission Statement and the Group Vision, J. Front Retailing is committed to creating high quality, fresh, hospitable and affluent lifestyles with its stakeholders by promptly responding to the changing times. The business activity of J. Front Retailing is to constantly seek to create rich markets that grow with local communities, which is led by department stores and Parco.

It is nothing less than to create, as a public entity of society, new values with which its various stakeholders empathize.

Circulating the Group’s business model and creating new values using the six capitals of J. Front Retailing effectively and efficiently are the process to create the brand value of J. Front Retailing, which will result in the creation of new values with which society empathizes.

Through this initiative, we will contribute to society at large as well as aiming at developing the Group.
We will provide genuine satisfaction captivating customers by offering new values.

We will increase corporate value over the long term through highly profitable and highly efficient management.

We will build the relations of trust by working hard together and aim to grow together.

We will increase corporate value over the long term through highly profitable and highly efficient management.

We will contribute to community development and promote environment-friendly business activities as a good corporate citizen.

We will realize workplaces in which employees’ performance and contribution are fairly evaluated and they can realize their exhibition of ability and growth and have job satisfaction.

We will increase corporate value over the long term through highly profitable and highly efficient management.

We will contribute to community development and promote environment-friendly business activities as a good corporate citizen.

We will increase corporate value over the long term through highly profitable and highly efficient management.

We will contribute to community development and promote environment-friendly business activities as a good corporate citizen.
“Multi Service Retailer” beyond the Framework of Retail

We are a business group with the retail business and the real estate business as its core, including department stores Daimaru and Matsuzakaya, commercial complexes Parco and a luxury commercial complex Ginza Six.

The histories of Daimaru and Matsuzakaya began respectively when Shimomura Hikoemon Shokei opened a kimono fabric store “Daimonjiya” in Fushimi, Kyoto in 1717 and Ito Genzaemon Sukemichi, a son of Ito Ranmaru Sukehiro who served Oda Nobunaga, opened a kimono fabric and fancy goods wholesale store in Honmachi, Nagoya in 1611. Both companies started as kimono dealers but have changed their business models for as long as 300 and 400 years, respectively, by responding appropriately to the changing times and grew as department stores.

After management integration in September 2007, the Company aggressively pursues M&A opportunities to expand its business wings for growth. We converted Parco Co., Ltd. into a consolidated subsidiary and StylingLife Holdings Inc. and other companies into equity method associates to broaden our business as a multi retailer with department stores as our core.

And under the new "FY 2017 to 2021 Medium-term Business Plan," we strive to change the Group structure toward development as a “Multi Service Retailer” beyond the framework of retail to expand our business domain for discontinuous growth based on the new Group Vision “Create and Bring to Life ‘New Happiness.’” With respect to the business portfolio, while growing the core Department Store Business and Parco Business, we will expand into new areas such as the Real Estate Business and Credit and Finance Business to increase their shares.
As a "Multi Service Retailer" beyond the framework of retail, we will capitalize on our business portfolio and core competence mentioned above and respond nimbly to changes in the times with the support of well-trained diverse human resources and effective governance that improves the transparency of management in an effort to create values demanded by society.
### Turning Point in Department Store Business Model

Japanese department store sales decreased from ¥9.713 billion in 1991 to ¥5.953 billion in 2017, almost 60% level. Amid environmental changes such as intensifying competition beyond industry boundaries and rapidly growing e-commerce, we think the biggest problem of department stores is that the department store business model including sales floor composition overly dependent on women's clothing in spite of the downward trend of spending on clothing and the product range and tenant composition based on shoka shiire (purchase recorded at the time of sale), which developed from the high-growth period to the stable-growth period, no longer adapt to changes in the times and in customers’ sense of values.

Therefore, from the standpoint of values department stores should create, we intend to change our business model in four main directions. Through these initiatives, we will strive to attract more customers and increase profitability by enhancing store appeal.

### Department Store Value Chain and Competitive Advantage

In order to entice customers to visit our stores, we need to offer the products they want and the experiences that can be given only in the store space or environment or through sales staff there, namely, new values. By changing our business model, we will strive to enhance store value by adding a perspective of values for customers and values for stakeholders.
Direction of Changing Business Model

Point 1
Active introduction of real estate rental format

More than 80% of current typical department stores offer products and have tenants based on shoka shiire. In other words, such business practice limits the diversification of store planning. Therefore, we will realize an optimal mix, for example, by expanding real estate leasing area to increase store appeal and transform the business model into a stable and highly profitable one.

<Hybrid form>

<Conventional form>

Point 2
Drastic reduction of allocation to women’s clothing

While reducing women’s clothing area, which remains bloated since the middle of 1980s, by 30% under the current Medium-term Business Plan, we will create new sales areas and newly zone the sales floors in response to changes in customers to increase store appeal. We will renovate our stores in a way that meets the market in each area, for example, by expanding beauty products, food products and daily sundries, which are growth categories.

Women’s clothing area
Down 30%
(Total FY 2017 to 2021 vs. FY2016)

Point 3
Area dominant formation that attracts customers with “areas”

Not as “points” of department stores but as “areas,” the Group will dominantly operate Parco and brand shops around department stores and also conduct activities in concert with local communities so that we can attract more customers. This is our own strategy that aims to grow with local communities by attracting new crowd.

Example of Urban Dominant Strategy in the Ueno Okachimachi area

Point 4
Strengthening of customer engagement using ICT

The “era of 100-year life expectancy” - “Lifetime Service Hub” is a challenge to establish a new customer information system in order to build stronger lifetime customer engagement. Using not only customer touch points through the Group’s cards but also the app that will be released this fall, we will accumulate fixed-form information and unfixed-form information in a multi-layered way through cross-group initiatives. We will provide new products and services to relieve customers’ “concerns” and “frustrations” by having more touch points with customers and building a long and deep relationship with them on various occasions and milestones for their entire life beginning with birth.

Integrated customer database
Q. **Would you explain about your business results for fiscal year 2017?**

The Company has applied the International Financial Reporting Standards (IFRS) since fiscal year 2017. Therefore, results for fiscal year 2016 have been converted into IFRS-based figures and year-on-year comparison for fiscal year 2017 has been made with thus converted figures.

The Company’s consolidated sales revenue was ¥469.9 billion, up 3.8% year on year, in fiscal year 2017. Consolidated operating profit and profit attributable to owners of parent were ¥49.5 billion, up 18.7% year on year, and ¥28.4 billion, up 5.3% year on year, respectively. Consolidated operating profit exceeded forecast in October by ¥0.5 billion.

Considering comparability with our past performance and other companies, we also release “gross sales” close to net sales under Japanese generally accepted accounting principle (“JGAAP”), which we had applied until fiscal year 2016, and “business profit,” which has been calculated by excluding the impact of other operating income and other operating expense from operating profit under IFRS, as our own reference indicators.

“Gross sales” were ¥1,138.9 billion, up 0.4% year on year, and “business profit” was ¥46.8 billion, up 4.3% year on year. “Gross sales” were ¥3 billion below forecast in October but “business profit” was ¥0.3 billion above the same forecast. Consolidated ROE on which we place the most importance was 7.5%.

We paid a year-end ordinary dividend of ¥18 per share, ¥3 more than originally planned, and an additional dividend of ¥1 per share commemorating the 10th anniversary of the establishment of J. Front Retailing, totaling ¥19. The annual dividend including the interim dividend of ¥16 was ¥35 per share, up ¥5 year on year, marking the seventh consecutive year of increase.

Q. **How did you perform by business segment?**

By segment, the Department Store Business saw further accelerated spending by inbound tourists to Japan in the second half. Spending by affluent people in Japan was also strong throughout the fiscal year. In the meantime, the severe sales slump in the suburban and rural stores continued.

We sold the real estate owned by Daimaru
Matsuzakaya Department Stores from the perspective of improving asset efficiency. As a result, sales revenue increased by 2.3% from the previous year and operating profit significantly increased by 20.0%. "Business profit" also grew by 9.1%.

With respect to the Parco Business, "Parco_ya," a store in new Parco format, which opened as the anchor tenant of "Ueno Frontier Tower" on November 4, 2017, performed well attracting many "a little older" people than Parco’s existing target customers as expected. Meanwhile, partly due to the impact of Shibuya Parco, which closed temporarily in August 2016 for rebuilding, continuing until the first half, the impact of the closing of Chiba Parco and the sluggish performance of Neuve A, sales revenue and operating profit in total decreased by 2.3% and 9.7% year on year, respectively.

The "Real Estate Business" significantly increased sales revenue by 168.3% and operating profit by ¥3.7 billion compared to the previous year due to the great effect of "Ginza Six," which opened in April 2017, and "Ueno Frontier Tower," which opened in November 2017.

In addition, the effect of withdrawal from unprofitable businesses including JFR Online and JFR Plaza contributed to improving consolidated performance.

The Company transferred all shares of Forest, a consolidated subsidiary operating a direct marketing business, which was included in Other, as of August 31, 2017 to replace the business.

In conjunction with that, the Company has decided to accede to Senshukai Co., Ltd., an associate accounted for using equity method, purchasing its own shares in February 2018.

0. The top line (sales) of the Department Store Business is growing.

In Daimaru Matsuzakaya Department Stores, spending by inbound tourists dramatically increased due to the success of the measures taken by its flagship stores with strong sales to inbound tourists to cater to increasing foreign tourists to Japan including the expansion of timepiece area, the expansion of sales areas that accept mobile payments at the point of sale and the strengthening of promotion using SNS at stores.

Tax-free sales of Daimaru Matsuzakaya Department Stores grew by 62.8% year on year to ¥47.9 billion or 1.4 times from those amid shopping spree called "bakugai" in fiscal year 2015 and have reached a level where they can be expected to exceed ¥50 billion a year. In particular, the number of customers jumped by 50.6% year on year. By merchandise category, sales of "consumables" mainly including cosmetics doubled from the previous fiscal year to almost the same level as "general products."

Credit sales of their flagship stores, which represent the company’s gaisho sales, increased by 1.5% from the previous year because the strengthening of events including a rare "selection of products" and highly attractive "experience" value in response to brisker spending by affluent people in Japan against the backdrop of stable share price level and the expansion of customer base by acquiring new gaisho cardholders, we could acquire 13,250 new accounts.

By store, sales of the Shinsaibashi store, which has
an overwhelming ability to attract inbound tourists, significantly increased for 14 consecutive months, up 14.0% year on year. The Tokyo store, which accurately brought in affluent people and increasing neighborhood office workers through strategic customer acquisition initiatives, increased sales for 18 consecutive months and the Sapporo store also increased sales for 15 consecutive months. Sales of six flagship stores were above the previous year’s level and total sales of existing stores increased for 12 consecutive months.

In the meantime, in terms of costs, though advertising expenses (up ¥0.6 billion) and operational costs (up ¥0.4 billion) associated with the opening of “Ginza Six” and “Ueno Frontier Tower,” repair expenses for replacement of facilities (up ¥0.1 billion) and supplies expense (up ¥0.05 billion) including utility costs increased, the whole company strived to further reduce costs by decreasing actual personnel expenses (down ¥0.1 billion) including outsourcing expenses and rent (down ¥0.1 billion). The company also sold its real estate from the perspective of improving asset efficiency.

As a result, operating profit of Daimaru Matsuzakaya Department Stores soared by 41.0% year on year to ¥28.2 billion and business profit as a reference indicator significantly increased by 22.7% from the previous year to ¥27.1 billion. Operating profit and business profit exceeded forecast in October by ¥2.6 billion and ¥0.9 billion, respectively.

Free cash flow was positive at ¥3.8 billion, better than forecast in October.

Q. In the meantime, why do you expect both business profit and operating profit of the Department Store Business to decrease in the current fiscal year 2018?

The Department Store Business is expected to increase sales revenue by 3.3% year on year because mainly the flagship stores of Daimaru Matsuzakaya Department Stores are projected to increase sales while the severe sales slump in rural and suburban stores is forecast to continue. However, factoring in system-related one-time costs including the replacement of POS systems with the ones that enable payment processing in the presence of customers in the second half and cost increase resulting from the improvement of facilities to make our stores safe and secure, we expect “business profit” to decrease by 2.2%. Since extraordinary income and extraordinary losses under JGAAP are included in operating profit under IFRS and there will be an additional decline in reaction to gain on sales of real estate recorded at approximately ¥1.4 billion in the previous year, operating profit is expected to decrease by 6.6%.

Factoring in the full operation of “Parco_ya,” a store in a new format, which opened in “Ueno Frontier Tower” in November 2017, the opening of Harajuku Zero Gate and Sannomiya Zero Gate and the performance of Neuve A business, which was sluggish last year but is expected to improve in the second half and beyond due to the rebuilding of strategy, the Parco Business expects to increase sales revenue and “business profit” by 4.8% and 4.5% year on year, respectively. However, operating profit is expected to remain at the same level as the previous year partly due to the absence of reversal of impairment loss recorded in the previous year.

The Real Estate Business expects sales revenue and “business profit” to significantly increase by 27.4% and 26.1% year on year, respectively, to which the full operation of Ginza Six, which opened in April 2017, and “Ueno Frontier Tower,” which opened in November 2017, will contribute. As is the case in the Department Store Business, however, operating profit is expected to decrease by 20.1% in reaction to gain on sales of real estate recorded in the previous year (¥1.6 billion).

The Credit and Finance Business expects sales revenue to increase by 7.1% year on year. While “business profit” is expected to decrease by 1.5%
because system costs associated with security enhancements will increase, operating profit is expected to increase by 0.3%. Other expects the growth rate of sales revenue to be almost at the same level as the previous year at 0.1% partly due to the negative impact of the transfer of shares of Forest. However, “business profit” and operating profit are expected to increase by 29.8% and 22.2%, respectively, factoring in the improvement of the performance of J. Front Design & Construction, which struggled in the previous fiscal year.

Q. Could you talk about these risks a little more?

138 risks are classified into strategic risks, finance risks, operation risks and hazard risks. We set priorities according to importance in the end. As a matter of course, however, the risks identified are different between the holding company and operating companies including department store operators and

Q. What are the achievements and challenges after fiscal year 2017 as the first year of the Medium-term Business Plan?

I think the last fiscal year 2017 as the first year of the Medium-term Business Plan, when big projects including “Ginza Six” and “Ueno Frontier Tower” contributed to growing the new Real Estate Business segment more than originally expected, got off to a good start as the first step of the “transformation of business portfolio” toward discontinuous growth which we are aiming at.

In the meantime, with respect to ICT initiatives as the measures to reinforce sales capabilities and a response to the Credit and Finance Business, which is highly positioned as a growth business, we are repeating trial and error. Unfortunately, however, it is undeniable that its progress lacks in speed and we have not achieved visible or tangible results yet. I think we need to shift gears to solve these urgent business issues.

The business environment is changing at an unprecedented speed. Various changes in the business environment mean “uncertainty” for businesses. Such uncertainty or risk includes an “opportunity” as a positive side and “threat” as a negative side. We need to capture these two sides of risk.

To this end, the Company redefined changes in the business environment as the risk associated with the Company, and at first, identified 138 risk items. The Risk Management Committee met and the Board members lodged together to discuss in-depth the business risks we consider particularly important among them, and finally, 15 items were identified.

Q. Collaboration with Parco seems to be progressing further in the wake of the opening of Ueno Frontier Tower.

Customer traffic to the main building of the Matsuzakaya Ueno store significantly increased after opening Ueno Frontier Tower on November 4, 2017. I think positive factors will certainly emerge by adding various events while implementing the Urban Dominant Strategy with new elements such as Parco, a cinema complex and offices under the new concept of “Shitamachi, Front.” The Matsuzakaya Ueno store intends to change the main building after researching new visitors after the opening of Ueno Frontier Tower instead of making a large investment before its opening. With respect to Shitamachi, Front, I think Daimaru Matsuzakaya Department Stores and Parco are successfully working with local shopping malls and the government.

We have decided to open Parco in the north wing of the Daimaru Shinsaibashi store as its anchor tenant after completing the main building. We are working on this project with Parco closely exchanging information with each other. The main building will open first in fall 2019. We will share information on it to build the Parco and Real Estate Businesses in the north wing. It is important to develop an idea of what constitutes an ideal form as a large hybrid commercial complex with a floor area of more than 80,000 square meters. What we would like to borrow from Parco is information on what to do after departure from department store’s traditional merchandise mix by category or where the new markets which department stores fail to tap into are created. You can expect the advanced form of collaboration with Parco beyond the results achieved in Ueno Frontier Tower.

Q. Could you talk about these risks a little more?

138 risks are classified into strategic risks, finance risks, operation risks and hazard risks. We set priorities according to importance in the end. As a matter of course, however, the risks identified are different between the holding company and operating companies including department store operators and
Q. Corporate governance reform in which the Company has actively taken the initiative since 2015

- Reform of the Board of Directors
- Succession planning
- Changes in the organizational structure
- Reform of officer remuneration system
- Improving and strengthening initiatives and information disclosure concerning “E” and “S” in FY2018

Created “ESG Promotion Division” as a dedicated unit in March

P/S at the internal performance report of department stores though they conduct business activities using significant assets. Therefore, we introduced store B/S and started the business management that incorporates ROA as a store manager’s performance indicator.

Also in the ICT field that currently requires a response with speed, we appointed a talent who possesses insight with respect to overall digital including AI from outside the Group as Executive Officer. Furthermore, in the credit and finance field that is expected to grow in the future, we appointed a highly professional person from outside the Group as the President of JFR Card, a consolidated subsidiary in the Group.

Recently, I often talk about the “combination of different elements” inside and outside the Company. I think it is possible that the new values demanded by the present times will be born in a place where different values and cultures bump into each other. It can be said that exactly the combination of different elements through discussions and collaboration among four companies that share high goals beyond company level enabled us to create and open an unprecedented luxury mall “Ginza Six” in April 2017.

I think “discontinuous growth” which the Company is aiming at is the aggregate results of new out-of-the-box initiatives born by breaking internal conventional rules and combining different elements.

Q. You have actively proceeded with governance reforms. How will you address the reforms from an ESG perspective?

As you know, GPIF, the world’s largest pension fund, signed the United Nations Principles for Responsible Investment (PRI) in 2015 and announced the selection of three ESG indices. This showed that financial information only is not enough to understand the reality of corporations and assess their

Parco. Among 15 risks identified, I asked the operating companies to specify high-priority ones as their risks after discussions. Some operating companies may have to focus on defensive risks and others need to heighten their perspectives a little more like the holding company. The risks thus identified are threats. On the contrary, they can be considered as opportunities.

For example, consumption tax will be raised in fall 2019. While worrying about a decline in consumption, we can convert it into a chance thinking of where spending by the child-raising generation who will be less burdened will go. With respect to “low birthrate and longevity,” given the “era of 100-year life expectancy,” even consumers in their 60s and 70s may become more eager to buy. Accordingly, it can also be considered as a chance. With respect to the “evolution of technologies,” its speed is too high and it would be terrible if we fail to follow it. However, if we can successfully incorporate the evolution, it will become a chance. “Income” may become increasingly “polarized” in the future but we can make it a chance by serving affluent people well, which is department store’s strength. It is important to closely look at the both positive and negative sides of risk and incorporate them into a concrete strategy.

Q. The recruitment of experts from outside the Group is becoming activated.

The Company has strengthened the orientation toward so-called B/S-based management that is conscious of asset efficiency since last year, for example, by making a balance sheet for each department store. It was the perspective of Executive Officer in charge of finance strategy who had been invited from manufacturing industry, not from retail industry, that triggered this. He said he felt something was wrong with the situation where we discussed only P/S at the internal performance report of department stores though they conduct business activities using significant assets. Therefore, we introduced store B/S and started the business management that incorporates ROA as a store manager’s performance indicator.

Also in the ICT field that currently requires a response with speed, we appointed a talent who possesses insight with respect to overall digital including AI from outside the Group as Executive Officer. Furthermore, in the credit and finance field that is expected to grow in the future, we appointed a highly professional person from outside the Group as the President of JFR Card, a consolidated subsidiary in the Group.

Recently, I often talk about the “combination of different elements” inside and outside the Company. I think it is possible that the new values demanded by the present times will be born in a place where different values and cultures bump into each other. It can be said that exactly the combination of different elements through discussions and collaboration among four companies that share high goals beyond company level enabled us to create and open an unprecedented luxury mall “Ginza Six” in April 2017.

I think “discontinuous growth” which the Company is aiming at is the aggregate results of new out-of-the-box initiatives born by breaking internal conventional rules and combining different elements.

Q. You have actively proceeded with governance reforms. How will you address the reforms from an ESG perspective?

As you know, GPIF, the world’s largest pension fund, signed the United Nations Principles for Responsible Investment (PRI) in 2015 and announced the selection of three ESG indices. This showed that financial information only is not enough to understand the reality of corporations and assess their.
sustainability and growth potential and that non-financial information including ESG information plays a more important role. I recognize it as a great change in capital market trends and as a strong message addressed to corporations which are regarded as the “public entities of society.”

The Company has actively taken the initiative in the reform of the “G” of ESG or governance. In light of these trends in the capital markets, we created “ESG Promotion Division” as a dedicated unit in March. And going forward, we will also strengthen initiatives and information disclosure concerning the “E” and “S” both in terms of quality and quantity.

To this end, we identified materiality or “important tasks” we should address. Firstly, we conducted a questionnaire of stakeholders concerning 25 candidate materiality items and collected responses from 4,250 stakeholders. In the next step, we had internal discussions based on major guidelines including the GRI Standards and ISO 26000 and the assessment items of research institutes. And we have formally decided the degrees of materiality through discussions at the Board of Directors meetings. Thus by identifying and disclosing our materiality, we will make clearer the relevance between social issues and business activities and proceed with initiatives based on the concept of “CSV” or “Creating Shared Value.”

Going forward, we will set the medium- to long-term quantitative materiality goals which we should achieve, and in fall, we will hold “ESG briefings” for institutional investors.

Q. Would you explain your view of shareholder return?

During the five-year period of the Medium-term Business Plan, we will generate operating cash flows of ¥260 billion or more and allocate ¥200 billion to capital investment and growth investment for the innovation of existing businesses and the transformation of business portfolio.

Investment in the five-year period of the Medium-term Business is expected to peak in fiscal year 2019 when the “main building of the Daimaru Shinsaibashi store” and “new Shibuya Parco,” which are being rebuilt, and subsequently, in fiscal year 2020 and 2021, free cash flows of more than ¥20 billion each are projected to be generated.

Five-year cumulative free cash flows of ¥60 billion or more will be allocated to shareholder return and the expansion of equity. Our shareholder return policy is to consider purchasing our own shares as appropriate on the basis of dividend payout ratio of at least 30% and in view of our financial condition.

The Company increased dividends for seven consecutive years until the previous fiscal year ended on February 28, 2018. Also in the fiscal year ending on February 28, 2019, we are planning to increase an annual ordinary dividend by ¥2, marking the 8th consecutive dividend increase.

As mentioned above, by promoting capital policy in consideration of the balance of strategic investment, the improvement of shareholder return and the expansion of equity, we will strive to realize the management structure that can achieve ROE of 8% continuously.

The Company’s current cost of shareholders’ equity has been calculated to be about 6%, and over the medium term, it is expected to remain within the range of 6 to 7%. Therefore, I recognize that the target ROE of 8% set under the current Medium-term Business Plan is the minimum level to be achieved in order to meet shareholders’ expectations. The transformation of business portfolio is expected to lead to reduction of equity cost as well as helping building up a business structure foundation. We would like to steadily accumulate tangible results to develop as a “Multi Service Retailer” beyond the framework of retail.
Risk is “Uncertainty”

Seeing both the positive side “opportunity” and the negative side “threat”

In order to develop strategies, the Company has analyzed opportunities for consideration in the past. Meanwhile, “risk” management was focused on hedging risks. However, as we can recognize both “positive risk (opportunity)” and “negative risk (threat)” if we define risk as “uncertainty,” we have thought we will be able to increase profit opportunities by taking risks in addition to hedging risks as in the past.

The Company redefined changes in the business environment as the risk associated with the Company, and at first, identified 138 risk items. The Risk Management Committee met and the Board members lodged together to discuss in-depth the business risks we consider particularly important among them, and finally, we identified 15 items as our business risks.

In fiscal year 2018, the holding company and operating companies respectively selected six items they place particular importance on from these 15 items and incorporate them into their management policies to promote their specific action plans. With these initiatives, we will further change our business portfolio through “discontinuous growth” as a “Multi Service Retailer” beyond the framework of retail to realize the Group Vision “Create and Bring to Life ‘New Happiness.’”
Identified 15 items as the Company’s business risks and selected 6 items (bold letters) we place importance on in the current fiscal year.
Phase of changing the Group structure

Got off to a Good Start toward Changing Business Portfolio

FY 2017 to 2021 Medium-term Business Plan

We have defined the five years from fiscal year 2017 to 2021, when the big development projects launched under the FY 2014 to 2016 Medium-term Business Plan will be completed and generate revenue, as the period of the current Medium-term Business Plan. We will achieve dramatic growth by completing these development projects. And at the same time, positioning the period as a turning point to drastically alter the course of the management of the Group toward realizing discontinuous growth based on the new Group Vision, that is, a “phase of changing the Group structure,” we aim to achieve ROE of 8% or more in fiscal year 2021.

To this end, by taking a step forward from the past idea of a multifaceted retailer to expand into new business fields as a “Multi Service Retailer” beyond the framework of retail while further accelerating our efforts to identify unprofitable business fields, we will aggressively promote business reshuffle.

With these initiatives, we will achieve the Group’s sustainable growth and medium- to long-term enhancement of corporate value.

Idea on business portfolio

The “Real Estate Business” was newly added as a reportable segment in fiscal year 2017 and the Group has a total of four segments including the “Department Store Business,” the “Parco Business” and the “Credit and Finance Business.” We will decrease the share of the Department Store Business and the Parco Business, which represented almost 90% of operating profit of the Group, to around 70%, and instead, strengthen the Real Estate Business and expand new business fields to increase their share.

In fiscal year 2017, which is the first year of the current Medium-term Business Plan, the Real Estate Business segment grew substantially due to opening of “Ginza Six” and “Ueno Frontier Tower” for which preparations we had proceeded with as big projects. Thus we got off to a good start toward changing business portfolio at which we are aiming.

Transition to the International Financial Reporting Standards (IFRS)

For the purpose of implementing efficient management based on appropriate asset evaluation and managing our business with a focus on profit for the current period as well as strengthening accountability to domestic and overseas investors by improving the international comparability of financial information, we decided to voluntarily apply the International Financial Reporting Standards (IFRS) beginning in March 2017 when the current Medium-term Business Plan started. We will disclose the Group’s business forecasts and results including the quantitative management objectives of the Medium-term Business Plans under IFRS.

When disclosing our financial results, considering comparability with our past performance and our peers, we release “gross sales” close to net sales under Japanese generally accepted accounting principle (JGAAP) and “business profit” as our own reference indicators.

Finance strategy structure diagram

Capital investment under the Medium-term Business Plan

Capital investment is expected to peak in fiscal year 2019 when the new main building of the Daimaru Shinsaibashi store and new Shibuya Parco, which are being rebuilt, will open, and in the following fiscal year 2020 and beyond, free cash flows of ¥20 to 30 billion level are projected to be generated each year.

Overview of Medium-term Business Plan

Promoting the expansion of business fields including service fields beyond the framework of retail and strengthening highly efficient businesses to realize the new Group Vision in consideration of increasingly diverse lifestyles

Expanding real estate lease area by strengthening the function of the Real Estate Business and expanding Urban Dominant initiatives for growing with local communities

Developing ICT infrastructure and strengthening EC to increase profitability and strengthening relations with customers and creating new businesses using ICT

Heightening the appeal of real stores including department stores and Parco and enhancing soft contents to respond to increasingly diverse means of seeking enjoyment

Promoting strengthening of corporate governance (transition to a Company with Three Committees (Nomination, Audit and Remuneration Committees)), the Group finance strategy (transition to IFRS), renovation of the Group operations systems, the Group organization/HR reform and CSR activities
Growing and Coexisting with Local Communities

Ginza Six

The Ginza area’s largest luxury mall “Ginza Six” made its grand opening on April 20, 2017 drawing much attention from all over Japan and even from abroad. More than half of 241 world-class quality brands that were carefully selected and collected are flagship stores. In addition, the creation of unconventional store environment using art, customer management and analysis using ICT, and promotion creating a buzz and conscious of being spread on SNS are also a symbol of “discontinuous growth” we aim at.

By category, luxury brands are very popular among affluent people in Japan and inbound tourists to Japan. Fashion items are steadily creating customer loyalty by offering Ginza Six limited items. Cosmetics draw customers from Japan and abroad by actively providing unique services and events. Food products are also popular due to successful lineup of items available only at Ginza Six, many of which are sold out.

Another feature of this project is a great deal of attention from the media. In April when it opened, the total number of media exposures including before and after its opening such as TV, newspaper, magazine and the Internet, was as many as 8,200. The overwhelming number of media exposures created a chain reaction that “fame attracts fame.”

We think there are two key factors for success (KFS) in Ginza Six.

One is the “combination of different elements” through initiatives beyond company level. Ginza Six is a big project for which four companies including J. Front Retailing, Mori Building, Sumitomo Corporation and L Catterton Real Estate collaborated. These four companies which have totally different backgrounds and corporate cultures jointly aimed at creating new world-class value and put together their wisdom and energy in the world’s leading commercial area Ginza. As a result, we think the unprecedented “innovative luxury mall” causing a buzz worldwide was born by the chemical reaction that occurred among these four companies or “four different elements.”

The other is many brand new ideas we tried toward “discontinuous” growth, not an extension of the status quo by choosing to abandon our past successful experiences and “not to make it a department store.” We could create special experiences and values available only there including luxury duplex boutiques adding color to the façade, store space design such as the bold atrium welcoming visitors with art, the unique layout of passages reminiscent of the “back alleys in Ginza” and the floor composition beyond the so-called framework of department store’s merchandise classification. In other words, in the era when online shopping is rapidly growing and it has already been said that “online shopping is driving out real stores” in Western countries, we think we could present an “answer” to the questions...
What values are expected of real stores to provide and what is the meaning of the existence of real stores?

Ueno Frontier Tower

The south wing of the Matsuzakaya Ueno store was rebuilt and “Ueno Frontier Tower” opened on November 4, 2017. With an anchor tenant Parco on the 1st to 6th floors, the Matsuzakaya Ueno store on the 1st basement floor, Toho Cinemas on the 7th to 10th floors and highly functional offices on the 12th to 22nd floors, a commercial complex as a new landmark in the area was born.

This is the first big development project jointly implemented by Daimaru Matsuzakaya Department Stores and Parco. The initiatives of Daimaru Matsuzakaya Department Stores and Parco achieved a certain result in joint sales promotion and others in the areas where the stores of the two companies are adjacent to each other. And we think this project led us to enter into a stage where the Group synergy with Parco shifts into full swing in more situations. The new Parco store opened in this “Ueno Frontier Tower” was named “Parco_ya,” which is an example of new initiatives with unprecedented concept. Specialty shops were selected to attract the customers who visit the adjacent Matsuzakaya Ueno store or Toho Cinemas Ueno and workers in offices on upper floors. “Parco” opened a store in a new area in the 23 wards of Tokyo for the first time in 44 years. Under the new name “Parco_ya,” the store contributes to tapping a new market in the area with a brand lineup suitable for the surrounding environment and catering to a little older people than Parco’s existing target customers.

In conjunction with the opening of this “Ueno Frontier Tower,” the Urban Dominant Strategy in the Ueno Okachimachi area, which was named “Shitamachi Front,” started in full swing. Specifically, we enhanced dissemination of local information and appeal using the community site “Ueno ga Suki.” At the same time, by creating multiple sales spaces in conjunction with this “Ueno ga Suki,” we built a new mechanism to increase customer loyalty, which helps strengthen customer relations. In addition, by holding various events starting from the adjacent “Okachimachi Panda Hiroba” to dramatically increase our ability to attract customers, we will contribute to revitalizing the whole area.

Promoting urban development in key areas

In addition to these big development projects, the Group will make active efforts to further expand real estate leasing area in urban areas which can be expected to grow.

New commercial facilities which opened, or will open, in fiscal year 2018 include four projects by the Real Estate Division of Daimaru Matsuzakaya Department Stores such as “Blue Bottle Coffee” in the Nanzenji area, Kyoto and three projects by the Zero Gate business of Parco such as Kyoto Zero Gate and Harajuku Zero Gate, totaling seven projects. Furthermore, we are considering promoting five projects or so around flagship department stores in fiscal year 2018.

At the same time, in five key areas including Shinsaibashi, Kyoto Karasuma, Kobe Motomachi, Nagoya Sakae and Ueno Okachimachi, we will also clarify respective “area strategies” by implementing promotion programs for developing the areas around department stores and motivating people to visit the areas in collaboration with local communities to promote the Urban Dominant Strategy for growing with local communities.
“Aggressive” and “Defensive” toward Full-scale IoT Era

“Lifetime Service Hub” concept

The Group has a great advantage of holding good customer assets mainly through Daimaru, Mtsuzakaya and Parco. Currently, however, most of our contact points with these customers are real stores and other retail, which is only a small part of their lives.

Therefore, we intend to build a new customer base named “Lifetime Service Hub” and create a system for “strengthening lifetime customer engagement.” And thereby we will collect and use not only “fixed information” obtained when providing products and services but also “unfixed information” obtained through daily conversations with customers and communities to understand customers more deeply than ever and dramatically enhance engagement.

The “Lifetime Service Hub” is illustrated by the chart on the right. With so-called “era of 100-year life expectancy” in mind, we will provide new products and services that help relieve customers’ “frustrations” and “concerns” by having more contact points than ever and building long and deep relations with them on various occasions and milestones throughout their lives beginning from birth to expand our business fields.

The “entry into early childhood education business” through the establishment of a new company “JFR Kodomo Mirai Co., Ltd.” is a part of our initiatives based on the concept mentioned above. By contacting with people in their infancy, which is the beginning of life under the “Lifetime Service Hub” concept, and having many day-to-day communications with their parents while putting the provision of high quality and advanced early childhood education first, we would like to create opportunities for providing new value.
Advancing sales activities using digital technology

What is expected in the use of ICT particularly in department stores is the perspectives of the “provision of new customer experience” and the “advancement of sales measures.” Beginning in the current fiscal year, Daimaru Matsuzakaya Department Stores will promote full-scale digital strategy by incorporating knowledge from outside the company. Specifically, by introducing a communication-based mobile application equipped with point card function (The payment function is scheduled to become available next fiscal year.) starting from the Daimaru Tokyo store in fall 2018, improving gaisho sales activities using digital tools (SFA), and increasing sales areas where inbound tourists can make mobile payments, we will overhaul all sales process operations to reform department store operations so that they catch up with the era of ICT.

With respect to department store e-commerce (EC), we will revise the conventional “full category” lineup conscious of real department stores by narrowing it down to gift, beauty and food products in which the strength of department stores can be shown, we would like to achieve tangible results.

Shift to cloud-based systems in the Group

It is necessary to introduce “high speed,” “low cost” and “secure” systems in order to diversify businesses and develop new businesses using IT. Therefore, the Group decided to build IT infrastructure, which serves as a basis for creating and operating systems, in the cloud, and beginning in fiscal year 2018, the systems of J. Front Retailing, Daimaru Matsuzakaya Department Store and other subsidiaries and associates in the Group will be basically developed and operated in the cloud. At the same time, we will study hundreds of

Work style reform starting from RPA

We are introducing RPA (Robotic Process Automation) to realize the “work style reform” using ICT. Specifically, at three companies including J. Front Retailing, Daimaru Matsuzakaya Department Stores and JFR Service, routine operations such as expense calculation, download and tabulation of accounting data, checkup of data and creation of and input to performance management table are picked up to be covered by RPA. In fiscal year 2017, RPA was introduced to 48 operations among them, reducing about 4,400 man-hours. In fiscal year 2018, RPA will cover additional 60 operations, expecting about 5,400 man-hour reduction. During the five-year period of the current Medium-term Business Plan, we will automate about 28,000 man-hours by expanding RPA to 300 operations across the Group to increase productivity.

While going paperless using this initiative, we will realize BYOD (Bring Your Own Device) ensuring system security and create a telework environment for full-scale “work style reform.”
Creating “Future Department Store”

Structural issues facing department stores

According to the statistics of the Japan Department Stores Association, department store sales in Japan remain on a downward trend after peaking at ¥9.7 trillion in 1991. There are multiple causes including store saturation, a shift in demographics, shrinking rural economy, globalization, changes in consumption quality and changes in customers. We think one of the important issues we should resolve is the store structure overly dependent on fashion clothing, which rapidly expanded in the early 1980s.

According to the Family Income and Expenditure Survey by the Ministry of Internal Affairs and Communication, the percentage of expenditure on clothing of the “annual average of monthly consumption expenditure per household” decreased from 7.3% in 1991 to 3.8% in 2017. Behind this trend, we assume that there are great changes in ways of self-expression and values particularly among young people as well as increasing globalization and casualization of fashion, and furthermore, a shift to online shopping.

In spite of these changes in customers’ buying behavior, in flagship department stores, the sales floor area of women’s clothing remains bloated since the late 1980s. We are planning to reduce the area by about 30% or 16,000 square meters compared to fiscal year 2016 during the period of the current Medium-term Business Plan in an effort to correct this gap.

In the spaces newly created by such reduction, we will expand categories and contents that have growth potential and the ability to attract many customers. In the current fiscal year, we are planning to reduce sales area by around 10% compared to fiscal year 2016 mainly in the Daimaru Umeda and Sapporo stores and the Matsuzakaya Nagoya store. In thus created spaces, we will change merchandising by creating sales areas combining beauty products, food and daily sundries and introducing the brands that meet the demand for service and experience-focused consumption to respond to changes in the market for each store.

Rebuilding of the main building of the Daimaru Shinsaibashi store looking ahead to the future

The rebuilding project of the main building of the Daimaru Shinsaibashi store is positioned as a symbol of innovation of the Department Store Business. The main building of the Shinsaibashi store is being
rebuilt aimed at opening in fall 2019. In the new main building, we would like to embody an innovative "new department store model" showing the future directions of department stores in all aspects including merchandise mix, service and environment, which have never been seen in existing department stores.

The strengths of the Shinsaibashi store are many affluent customers and the ability to pull in the greatest number of inbound tourists in Japan. While further strengthening these strengths, we will "create added value" including new services and experiences only available in real stores.

At the same time, by drastically revising our transaction format mix including "kaitori," "shoka shire" and "real estate rental" to achieve an optimal balance among them, we would like to embody an innovative and profitable "new department store model."

Changing the business model of the north wing using synergy with Parco

After completing the reconstruction of the main building, the business model of the north wing will make a major shift from a department store to real estate rental. The north wing has two basement floors and 14 floors above ground. We decided to open "Parco" as its big anchor tenant occupying the 2nd basement floor to the 7th floor above ground.

There is no store in Parco format in the Osaka area and many local customers have eagerly awaited for the opening of Parco. We think this project will meet their expectations and be positioned as an important measure to help Parco enhance the strength of store brand. It is also very meaningful as store opening in one of the key areas of the Urban Dominant Strategy implemented by the Company.

The big full-scale joint development of stores by the "department store" and "Parco" in this north wing is the second case following "Ueno Frontier Tower." Through this initiative, we will further expand the creation of the Group synergy.

And then, by connecting these two buildings, the new main building and the north wing, we will create an innovative and profitable hybrid commercial complex with a total floor space of more than 80,000 square meters to attract a wide range of customers from a wide area and draw new crowds to the area.

Future Standard Laboratory

Five years from now, how will we live? What tools will become mainstream? What clothing will we wear? What food will we eat? And what will we experience? – We created "Future Standard Laboratory" in 2017 to propose and deliver information on what will become a standard in the future. Contacting with various creators, cultural figures, universities, local communities and NPOs and many companies, we will promote the "combination of different elements" to "create" things and services/ experiences which will become standards in the future.

Structure of new main building and north wing of Daimaru Shinsaibashi store

Changing the business model of the north wing of the Shinsaibashi store to “real estate rental” after completing the new main building.

Anchor tenant “Parco” will occupy the 2nd basement floor to the 7th floor above ground. Upper floors will be operated by Real Estate Division.

Creating more synergy of the Group through the joint development of Daimaru Matsuzakaya Department Stores and Parco

Future Standard Laboratory

Five years from now, how will we live? What tools will become mainstream? What clothing will we wear? What food will we eat? And what will we experience? – We created “Future Standard Laboratory” in 2017 to propose and deliver information on what will become a standard in the future. Contacting with various creators, cultural figures, universities, local communities and NPOs and many companies, we will promote the “combination of different elements” to “create” things and services/ experiences which will become standards in the future.

Management Strategy
With respect to the direction of store planning, we aim to create next-generation commercial space that provides appeal unique to Parco’s own real store including new shopping experiences using the latest technologies for customer services, payment methods and others, new ideas to meet changing lifestyles of mature urban consumers, and “learning” and “experiences” using “Parco Theater” that will be newly reborn. Using the advantages of commercial complex including offices, we will expand the business by expanding contact with various companies, provide advanced tenant services using ICT, and cooperate in the “creation of Entertainment City” in Shibuya-ku.

By spreading the new achievements and know-how gained through this project to other urban stores gradually, we will realize the evolution of the store brand of entire Parco.

Expanding commercial real estate

As the initiatives of the Parco Business to expand commercial real estate including Zero Gate and new formats, eight development projects are in progress in fiscal year 2018. Specifically, Kyoto Zero gate, which partially opened in 2017, will fully open and three other stores including Harajuku Zero Gate and Sannomiya Zero Gate will open in fiscal year 2018. From late 2018 to fiscal year 2019, stores in new formats will open in Kinshicho and Urasoe, Okinawa. In addition, we decided to open Kawasaki Zero Gate in fall 2019 to cultivate the central part of Kawasaki-shi that is expected to grow and improve urban function.
**Improvement of customer services and tenant services**

In the stores business, we provide customer services and tenant services using ICT as a customer service and tenant support policy.

Aiming at digital transformation that is expected to be adopted on a full scale in new Shibuya Parco, which is planned to open in fall 2019, we conduct the pilot tests of the measures to provide new consumption experiences by expanding in-store services of commercial facility Parco.

For customers, we introduced a 3D scanner, which enables customers to post the 3D images of their coordinated styles on social media, at SR6 in Shibuya in December and use it to sell fashion items. We also developed voice search service Alexa Skill that provides voice guidance service in Parco stores and installed it in Ikebukuro Parco in April. Furthermore, aiming at improving our ability to offer information as media, we will implement various initiatives, beginning in the 2nd half of 2018, including increasing buying menu in conjunction with information on Pocket Parco.

For tenants and brands in Parco stores, we help them strengthen sales and the transmission of information. We changed the orientation training programs for newly employed people to be provided online so that they can take them at their convenient time and focus on customer services at stores.

When opened “Parco_ya” in Ueno Frontier Tower, we introduced at each shop Japan’s first service to analyze “store traffic” and “customer attributes” such as age and gender, which can be used to ensure appropriate personnel structure according to store traffic by time of day and changes in store traffic by date and time and revise product lineup according to customer attributes.

**Revitalizing existing stores**

In each Parco store, we promote renovation based on changes in consumption and store characteristics. In fiscal year 2017, we conducted renovation of approximately 35,000 square meters. In urban stores, mainly Nagoya Parco and Fukuoka Parco, “spaces” that offer new ways of communicating were provided and restaurants that offer information were introduced. In community stores, mainly Urawa Parco and Tsudanuma Parco, food floors, which play a central part in encouraging customers to make multiple purchases and stay longer in the store, were renovated and large-scale key tenants with strong ability to bring in customers were invited.

In fiscal year 2018, we are planning to renovate floor area of approximately 35,000 square meters under the theme of the creation of new added value that meets diversified consumption needs. By introducing key items, mainly “cosmetics” and “food”-related products, we will carry out renovations to expand the variety of fashion zones.

In urban stores, we will introduce “health & beauty” as a provider of added value for lifestyles and provide new food style ideas including formats and shop interior and common space decoration. In community stores, we will continue to strengthen their offering by introducing high quality supermarkets that meet market needs and improving food specialty shops.

**Managing Strategy**

Cultivating urban areas with growth potential by developing new formats in addition to Parco and Zero Gate

Building a Financial Base to Achieve an ROE of 8%

Promoting management in recognition of capital cost

The Group aims to achieve a consolidated ROE of 8% or more in fiscal year 2021, which is the final year of the Medium-term Business Plan. We began with recognizing shareholders’/investors’ expected return, that is, our cost of shareholders’ equity to set an ROE target of 8%.

The cost of shareholders’ equity has been calculated at a little less than 6% at the end of February 2018 but we see it moving in the range of 6% to 7% over the medium to long term. Therefore, we think we are expected to stably achieve an ROE of 8% or more exceeding the cost of shareholders’ equity mentioned above.

Production of cash flows and the balance between growth and return

The Group will generate operating cash flows of ¥260 billion or more in total during the five-year period of the current Medium-term Plan (FY 2017 to 2021), and from them, ¥200 billion will be allocated mainly to capital investment in existing businesses and growth strategy investment to expand into new businesses toward restructuring its business portfolio.

A little more than 60% of such investment will be allocated to the Department Store Business and Parco Business, which are the Group’s core businesses, a little less than 20% to the Real Estate Business, which was newly created as an independent segment, and a little less than 10% to Other. We are planning to invest ¥27 billion in M&A for growth.

We expect to generate free cash flows of ¥60 billion or more in five years. They will be used to expand equity targeting an equity ratio of 40% and to return profits to shareholders targeting a consolidated dividend payout ratio of at least 30%. We will also consider purchasing our own shares as appropriate.

Adopting store-by-store balance sheet

The Department Store Business operates using large assets. In fact, however, a strong focus had been put on profit and loss statement (P/L) at a store level. In other words, stores had been less conscious of balance sheet (B/S). Therefore, we have decided to "change employee mindset" to increase ROE across the Department Store Business including all its companies and stores by adding a B/S perspective (assets/liabilities/shareholders’ equity) to business management and clarifying the management targets of the whole Business and each department store.

Specifically, beginning in March 2017, each department store develops a B/S budget, which enables us to compare it with results and understand asset profitability. We prioritize investments considering each store’s ability to achieve a return on investment and expect effects from this that will lead to a curb on investment plans intended only to maintain or increase sales and drastic measures for poorly performing divisions. Each store will actively implement measures to enhance asset efficiency according to business size, regional characteristics and asset composition in an effort to improve ROA, asset turnover and performance.

In the first year of adoption, we visualized each store’s B/S like an independent company by transferring land and buildings, operating receivables and payables and others, which had been recorded by the head office, to each store and budgeted ROA of each store and added it to the performance indicators of Store Managers and others. As a result, partly thanks to an increase in operating margin...

4. 商品回転率
5. 投資回収

Investment Project Review Committee and Revitalization Plan Review Committee

The Company has created the “Investment Project Review Committee” and the “Revitalization Plan Review Committee” to support management decision-making on investment, business revitalization and withdrawal from a financial perspective.

The “Investment Project Review Committee” consists of the Senior Executive General Manager of Financial Strategy Unit as its Chairperson, the Senior General Manager of Management Planning Division as its Vice Chairperson and other members from Financial Strategy Unit, Management Planning Division and Legal Division. The Committee has in place a system that enables the participation of external institutions in order to present more objective and stricter opinions. We make an investment decision using the payback method for investment in store renovations, the NPV method for development investment (present value discounted using WACC ≥ 0), and the DCF method for M&A. In addition, the Committee checks many areas including legal risks and financial risks (calculation of shareholder value).

Specifically, in fiscal year 2017, they examined Parco’s new store opening projects in Kinshi-cho and the north wing of the Daimaru Shinsaibashi store and the establishment of a new operating company (JFR Kodomo Mirai Co., Ltd.).

The “Revitalization Plan Review Committee” is composed of the Senior General Manager of Management Planning Division of Management Strategy Unit as its Chairperson, the Senior General Manager of Budget and Management Support Division of Financial Strategy Unit as its Vice Chairperson, the Senior Executive General Manager of Management Strategy Unit and other members from Budget and Management Support Division.

Specifically, the Committee classifies the businesses of the Group into three phases including “I. Normal,” “II. Caution needed” and “III. Revitalization or withdrawal to be considered” and reviews them on a regular basis. One of the criteria for the “phase III” in which revitalization or withdrawal is to be considered is "two consecutive periods of operating loss." Concerning the companies, businesses, stores and others that meet the criterion, mainly a relevant company prepares the measures for “revitalization or withdrawal.” The Committee validates these businesses and determines the validity of the measures as well as providing information to facilitate swift management decision-making at the Group Management Meetings and the Board of Directors meetings.

Human Resources “Creating” Happiness

J. Front Retailing (the “Company”) believes individual employees, that is, “human resources” lead the creation of added value, which is essential for sustainable corporate growth, and that human resources are the most important management resources. Based on the belief that “people grow by getting their job done,” we will develop human resources by linking four elements including recruitment, allocation, evaluation and development and maximizing energy that drives growth valuing the thoughts of each and every employee.
We thoroughly develop and strengthen employees’ “personal basic skills” required for leaders with a focus on their first three-year career at the JFR three-year training school for new employees with college degrees (JES). We provide a “career development training” to employees aged 27 where employees review their experiences from the past to the present for future career development.

With the aim of creating new value by combining different elements, we actively give employees opportunities to work for external bodies and attend MBA programs and external training sessions (IFI, Globis, etc.). In addition, we provide them with opportunities to show their intentions including the self-application system, milestone interviews and the career entry system. We also strive to improve the expertise courses of the Career Support College (self-development school) to give opportunities for obtaining professional knowledge and skills. In fiscal year 2017, a total of 539 employees attended the Career Support College including correspondence courses.

With respect of “allocation,” which is an important factor in “developing human resources through jobs,” we put the “right people in the right jobs,” which vitalizes each person and brings out the best in him/her, at the Group level by focusing on each employee, finding new human resources and actively providing opportunities. To this end, using the human resources information system named “Talent Management System,” which integrates human resources big data on approximately 10,000 employees of the Group, human resources divisions and job sites work together to promote allocation and development planning based on human resource attributes and certain human resource assumptions.

The selection of the chief executive officer is the most important strategic decision-making and the Company positions the development and implementation of succession plans (for the next senior management team) as matters of particular importance in terms of management strategy. Therefore, we select some people from “all the human resources of the Group” as candidates for the next senior management team members and provide the employees selected from them with focused development programs organized by the “JFR School.”

The “JFR School” is composed of the “JFR Business Management School” (for candidates for the next senior management team members), the “JFR Management School” (for candidates for the next general managers) and the “JFR Leader School” (for candidates for the next managers) to produce managerial talents over the medium to long term. We aim to develop the next generation leaders as soon as possible by fostering management perspectives, sharing awareness of issues with the senior management team and applying strategies to specific action plans and implementing these plans with a focus on five desirable qualities required of the Group managerial talents in addition to allocating these human resources in a well-planned and strategic way based on the belief that “a person’s growth depends on his/her job.”

“Desirable qualities required of the Group managerial talents: “strategic mindset,” “reform-oriented leadership,” “tenacity to achieve results,” “organization development strengths” and “human resource development strengths”

The total number of employees who attended the training programs including the Group general manager training programs and the Group manager training programs in fiscal year 2017 was 621 and the total time of these programs was approximately 22,400 hours.

The “1st JFR Creation Award” presentation at Ginza Six
Sustainability Initiatives

The Company newly formulated the "Sustainability Policy" and identified "materiality" after discussions at the Management Meetings and the Board of Directors meetings. Based on the premise that the medium- to long-term quantitative goals will be set, we have decided to formulate and release a specific action plan around October 2018 to achieve them.

In this Integrated Report, we show the five materiality issues selected by the Company and the process to identify these issues and the direction of future specific actions as well as reporting our past sustainability activities.

Sustainability Policy

With People, with Local Communities, with Environment to Realize New Happiness in Sustainable Society and Life

The society where we live, whether in Japan or overseas, faces various social issues including unusual weather, water resource crisis, resource depletion, widening gap, incomplete employment and human rights issues. Among them, environmental risks have been getting particularly remarkable in recent years. The environment surrounding us is changing significantly due to global warming and worsening global environment. Companies are increasingly expected to contribute to sustainable society including actions to address climate change under the Paris Agreement and social issues covered by the "Sustainable Development Goals (SDGs)" adopted by the United Nations as part of global initiatives. It is essential for companies to tackle environmental, social and governance (ESG) issues.

In the meantime, Daimaru and Matsuzakaya, which are the foundations of J. Front Retailing Group, have conducted business activities under the corporate credos "Service before profit" and "Abjure all evil and practice all good," which show their commitment to pursuing the right path, over their long histories of 300 and 400 years. Based on this, we newly developed the Vision "Create and Bring to Life 'New Happiness.'" And we always think of each and every customer's life and conduct business activities to make their futures happy.

We have many places where we communicate with customers, including retail stores. Various people including customers, employees, business partners and local people get together and meet there. Local communities in which people root assume an important role in keeping these communication places rich. And we believe it is important to hand down the irreplaceable global environment that supports all to the next generation smoothly so that local communities will continue forever as contact points always filled with vitality. That is to say, it is important to keep communication places in order to create and bring to life new happiness, which we aim to realize. And this cannot be realized without a sustainable society.

We defined the places for communicating with customers as a focus area of J. Front Retailing's sustainability management and we will unite and make proactive and serious efforts to realize a sustainable society. To this end, we have received various opinions from stakeholders through questionnaires and have had many discussions at the Management Meetings and the Board of Directors meetings since last year. As a result, we identified five materiality issues to be addressed by us including "contribution to a low-carbon society," "management of the entire supply chain," "coexistence with local communities," "promotion of diversity" and "realization of work-life balance." We believe our efforts to address these materiality issues will contribute to achieving the global "Sustainable Development Goals (SDGs)." Among these five materiality issues, the management team put the greatest focus on "contribution to a low-carbon society (action on climate change)," which is an urgent issue. We are addressing this issue as the mission of a member of society and working on developing the "JFR Eco Vision" with an eye to 2050 to help realize a sustainable society. Based on this vision, we will aim to achieve both the resolution of environmental issues and corporate growth.

As mentioned above, we will meet our environmental and social responsibilities to all customers to realize a sustainable society, and as a Multi Service Retailer, we will create new happiness to be brought to each and every stakeholder's life. At the same time, we will continue sustainable growth by strengthening corporate governance to tirelessly continue this initiative.
We strive to build a relationship of trust with all stakeholders (customers, shareholders, business partners, employees, local communities, etc.) through business activities and actively address sustainability issues including environmental and social issues based on the spirit of the Corporate Credo, the Basic Mission Statement and the Group Vision in order to achieve the Group’s sustainable growth and medium- to long-term enhancement of corporate value.

With the aim of further deepening these efforts, we identified materiality that contributes to the realization of “sustainable growth of companies and society” and “sustainable society” in the process of clarifying the relationship between business activities and social issues.

Specifically, firstly, we selected 25 candidate materiality issues from the perspectives of: (i) the environmental/social issues that are meaningful for us to address and can produce results and (ii) the issues we can tackle using our core businesses. Secondly, we conducted a questionnaire survey of 4,250 stakeholders on these 25 issues to secure objectivity and diversity. And based on the results of the survey in which the GRI Standards (GRI: Global Reporting Initiative, a nonprofit organization that develops international sustainability guidelines), the assessment items of ISO 26000 and SRI (Socially Responsible Investment), SDGs (Sustainable Development Goals)* and review by the President are reflected and after discussions at the Management Meetings and others within the Company, we developed a materiality map. And finally, we narrowed down the list of materiality issues to and formally determined five items at the Board of Directors meetings.

Concerning these materiality issues, we will set long-term goals to be achieved and formulate an action plan to contribute to resolving social issues through business activities and develop as a company.
Five priority materiality issues to be addressed by J. Front Retailing

"SDGs (Sustainable Development Goals)

Global goals for the period from 2016 to 2030, which are included in the "2030 Agenda for Sustainable Development" adopted at the United Nations summit in September 2015. They contain 17 goals with 169 targets including "climate action," "good health and well-being," "gender equality" and "decent work and economic growth" and pledge to leave no one behind.
Materiality principles and specific actions

**Contribution to a low-carbon society**

**Principles**
We will aim to contribute to preventing global warming and air pollution and make the global environment sustainable by developing the long-term environmental vision and working by ourselves to reduce energy consumption, increase the efficiency of energy use and use renewable energy and working with business partners to achieve zero emissions.

**Specific actions**
- Reduction of energy consumption
- Installing LED lighting in stores, rooftop greening, paperless operations, promoting telework, etc.
- Shift to low-carbon energy
- Shift to renewable energy in directly managed stores
- Energy shift
- Shifting company cars to electric cars
- Other
- Reducing and recycling food waste
- Expanding ethical consumption and promoting awareness activities

**Management of the entire supply chain**

**Principles**
We will enhance the corporate values of both the Company and its suppliers by fulfilling social responsibilities and promoting environment-friendly initiatives at the entire supply chain to eliminate risks at the entire supply chain and providing the products that customers can use pleasantly and securely in terms of society and the environment.

**Specific actions**
- Supply chain policy
  - Developing and sharing supply chain initiatives to address social issues including human rights, the environment and safety and security
  - Promoting initiatives with the suppliers who agree to the policy
  - Evaluating the CSR of suppliers
- CSR for procurement and delivery
  - Working with suppliers to promote the improvement of fuel efficiency and the reduction of delivery frequency in the entire business activity including product procurement

**Coexistence with local communities**

**Principles**
We will aim to contribute to revitalizing the area and grow with local communities over the medium to long term by combining the realization of sustainable society and the realization of pleasant shopping unifying stores and communities in the area through coexistence with local communities to increase the appeal of the area.

**Specific actions**
- Urban Dominant Strategy
  - Increasing the appeal of the area by developing shops around a store as its core
  - Enhancing the strength of area brand by realizing services through collaboration between stores and areas
  - Contribution to vitalizing local economy
  - Promoting initiatives to revitalization the area using know-how to operate a retail business (e.g. expansion of products produced locally for local consumption )
- Other
  - Supporting post-disaster recovery
  - Promoting industry-government-academia partnership that contributes to the development of the area and human resource development

**Promotion of diversity**

**Principles**
Realizing a company in which people with different cultures and customs, ages, genders and disabilities exist together and diversity is respected and accepted as a source of growth, J. Front Retailing Group will make contact points with various stakeholders diverse and attractive.

**Specific actions**
- Diversity initiatives
  - Developing diversity policy
  - Developing a policy to address women’s empowerment, LGBTIs, people with disabilities, etc. and providing trainings
  - Improving systems to receive employees (improvement of the work environment)
  - Increasing the ratio of women in leadership positions
- Providing seniors with opportunities to take active roles and revising or abolishing the retirement benefit scheme
- Lifting the ban on second jobs and side jobs
- Respect for human rights
- Developing human rights policy, providing in-house trainings and installing service environment equipment (e.g. the one to cater to LGBTIs)

**Realization of work-life balance**

**Principles**
With the aim of realizing true work-life balance that meets changes in lifestyles and diversified values, J. Front Retailing Group will innovate work styles using technologies, streamline operations, shift to creative operations and realize the work environment in which employees and their families feel happy.

**Specific actions**
- Promoting work-life balance
  - Work style reform including the institutionalization of homeworking and remote working using IoT, etc.
  - Improving operations and promoting RPA at each operating company
  - Expanding support for the work styles of employees with small children
  - Providing seniors with opportunities to take active roles and revising or abolishing the retirement benefit scheme
- Developing a nursing care leave system
- Employee healthcare
- Formulating a “plan for realizing health and productivity management” and establishing PDCA cycle

Planning to set the medium- to long-term quantitative goals to be achieved around October 2018
Steadily Reducing Environmental Load

Recently, various environmental issues arise on earth. In particular, the emission of greenhouse gases (CO2, etc.), which leads to global warming, and biodiversity loss, which affects food and health, are issues common to all humankind because they affect the entire earth.

Since the Group mainly operates a retail business, it can make the greatest contribution through product sales and other activities at stores and we believe that it is our social mission.

Therefore, we formulated the “J. Front Retailing Environmental Policy” and each company in the Group has in place a system to promote environmental conservation activities through business activities and conducts such activities.

J. Front Retailing Environmental Policy
Recognizing our roles and responsibilities to hand down the irreplaceable global environment to the next generation, we at J. Front Retailing Group (the “Group”) proactively promote “environment-friendly corporate management” toward the “realization of a sustainable society” with customers, business partners and community members.

Environmental and social activities management system

Daimaru Matsuzakaya Department Stores expands the ISO 14001 environmental management system and has in place an environmental and social activities management system. In order to promote these activities, we appoint the Senior Executive General Manager of Administration Headquarters as an “administrator”, Executive Store Managers and Store Managers as “managers” and division managers as “promotion managers” and “promotion staff” members in charge of practical operations are placed. They educate workers including people from suppliers.

Goals for FY 2017 to 2021 Daimaru Matsuzakaya Department Stores environmental and social activities

Daimaru Matsuzakaya Department Stores set the medium-term quantitative environmental targets for FY 2017 to 2021 in conjunction with the Medium-term Business Plan to conduct environmental activities.

<Quantitative targets>
- Reducing CO2 emissions from energy use by cutting energy use intensity by 5% in FY2021 compared to FY2016.
- Reducing the intensity of final waste disposal volume (Volume of waste generated - Recycling volume) by 5% in FY2021 compared to FY2016.
- Increasing the food recycling rate to the 60% level by FY2021.

| FY2017 to 2021 Daimaru Matsuzakaya Department Stores quantitative environmental targets (Including Hakata Daimaru, Shimonoseki Daimaru, Kochi Daimaru and Tottori Daimaru) |
|---|---|---|---|---|
| | FY2017 | FY2018 | FY2019 | FY2020 |
| CO2 emissions (intensity) | 0.0424 | 0.0414 | 0.0410 | 0.0405 | 0.0401 |
| Energy consumption (intensity) | 0.0204 | 0.0197 | 0.0196 | 0.0195 | 0.0193 |
| Final waste disposal (intensity) | 11.13 | 10.97 | 10.85 | 10.74 | 10.63 |
| Food waste recycling rate | 59.8% | 57.0% | 58.0% | 59.0% | 60.0% |

*1 Intensity: CO2 emissions (t-CO2)/Business hours (h) × Total floor area (㎡)
*2 Intensity: Crude oil equivalent energy (kl)/Business hours (h) × Total floor area (㎡)
*3 Intensity: Final waste disposal volume (kg) / Sales (million yen)
*4 Intensity: Volume of food waste recycled / Volume of food waste generated
Daimaru Matsuzakaya Ecoff recycling activities

Daimaru Matsuzakaya Department Stores conducts the “Ecoff recycling campaign” on a regular basis. Customers bring disused clothing, shoes and bags to the stores, and in exchange, we give them shopping support tickets so that they can buy new items at a small discount.

=ECO+OFF

“Sustainable participatory project” to eliminate burdens on customers and the earth through ecological activities that are friendly to the environment and society

A total of 299,170 renewable articles were collected in the campaign in April 2018 and the total number of articles collected since the first campaign in August 2016 exceeded one million. The collected articles are recycled into bioethanol and coke as well as the raw materials of textile products.

Promoting the installation of high energy efficient equipments and LED lighting

The Group adopts various energy saving measures to reduce CO2 emissions and prevent global warming. High energy efficient equipments are installed on the occasions of facility replacement, store renovation and new store opening.

Daimaru Matsuzakaya Department Stores strives to reduce electricity consumption and CO2 emissions by replacing existing lighting with LED units. In fiscal year 2017, we replaced approximately 7,000 units, mainly basic lights in the Tokyo, Kyoto and Kobe stores, with LED units, and by February 2018, 204,000 units, which account for about 48% of the total number of relevant lighting fixtures, were replaced with LED units.

Installing solar panels

At the Daimaru Kyoto store, a solar panel (rated output: 10kW), which is 11 meters long and 6.6 meters wide, was installed behind the peacock bronze sculpture. It is expected to generate approximately 6,000 kWh of electricity per year, which powers digital signage and external signs.

Forestation project

In October 2009, "Trojan," Daimaru Matsuzakaya Department Stores private brand of men’s clothing, launched a project “Trojan Forest Carbon Free” in collaboration with Carbon Free Consulting Corporation. One larch tree is planted in a forestation site in Inner Mongolia, China, for every 10 Trojan suits or jackets sold and 250 trees were planted on the first occasion. After that, we continue to plant trees, and at the end of February 2018, a total of 4,350 larch trees are changing the drought-stricken region in Inner Mongolia to a green zone. The growing of "Trojan Forest" contributes to preventing global warming caused by absorbing CO2, preventing the desert from expanding, preventing yellow dust from blowing, and creating jobs of planting trees for local people.

Ginza Six was certified as an “Urban Oasis” under SEGES*

In October 2017, the rooftop garden of Ginza Six “Ginza Six Garden” was certified as an “Urban Oasis” under the “SEGES (Social and Environmental Green Evaluation System)” (administered by the Organization for Landscape and Urban Green Infrastructure), which recognizes comfortable and attractive urban green areas.

The Ginza’s largest about 4,000-square-meter rooftop garden “Ginza Six Garden” is located on the roof of the about 56-meter-high building with 13 floors above ground. A green area of approximately 2,200 square meters, which accounts for about 56% of the rooftop garden, was newly created. Our large-scale greening efforts in the prime downtown location were highly recognized and we obtained such certification.

*SEGES
(Social and Environmental Green Evaluation System)
A system to recognize and certify outstanding green areas of the companies that contribute to society and the environment through greening activities.
With Local Communities, with Customers

As a corporate citizen, J. Front Retailing uses the resources of the companies in the Group and implements initiatives through business activities to contribute to revitalizing local communities and resolving various social issues.

1. Contribution to revitalizing local communities

Our Urban Dominant Strategy is a "business model for growing with local communities" by enhancing the appeal of the whole area with the stores at its core. Implementing the strategy helps attract more customers to the area and contribute to the area.

*For Ginza Six and Ueno Frontier Tower, please see pages 26 and 27.

Shop development around the Daimaru Kobe store

The Daimaru Kobe store has developed shops around it since 1987, about 30 years ago. Cutting-edge fashion brands are invited to open their boutiques in exotic buildings in Motomachi, Kobe, which historically developed as a foreign settlement, to attract more customers to the area. Currently approximately 60 shops operate around the store and the area combining shopping and sightseeing attracts customers from a wider area. The store organizes events using the appeal of the Former Foreign Settlement on a regular basis. In March 2017, Vogue’s shopping event “Vogue Fashion’s Night Out” was held. It was the first time in the world that the event was held in spring.

Kyoto Machiya project

In 2016, Daimaru opened the “Daimaru Kyoto Store Gion Machiya” as a special project celebrating the 300th anniversary of its foundation. In Gion, which has a taste of the old capital, we revived a dilapidated machiya (a Japanese traditional townhouse) and operate a luxury brand boutique that matches Kyoto, which combines “tradition” and “innovativeness” (Hermes from November 2016 to July 2017 and Hublot from August 2017). By preserving and using the machiya, we inherit historical value and contribute to revitalizing the area. And we are well received by people in Japan and abroad as well as residents in Kyoto.

Proposal for local production for local consumption

"Local production for local consumption" helps revitalize the local economy. It also helps reduce environmental load because CO2 emissions from transportation and refrigeration decrease due to short transportation distance. Each of the Daimaru and Matsuzakaya stores organizes events to provide a wide range of products including food, clothing and crafts and expand their sales.

2. Contribution to resolving the issues of the child-raising generation

With the aim of taking away some of the worries and inconveniences that accompany early childhood parenting, we launched the operation of unlicensed infant child care facilities that provide both enhanced early-childhood education and extended-hour child care. We will operate the facilities under franchise in collaboration with Tact Kodomomirai Co., Ltd., a group company of Yaruki Switch Group Holdings Co., Ltd., to provide a curriculum...
including not only "intellectual training" but also "physical exercise" and "English." The first facility named "Daimaru Matsuzakaya Kids Duo International Aobadai" will open in Aoba-ku, Yokohama in April 2019.

3 Contribution to the safety and security of customers

- **Operation of Customer Service Office**

  At the "Consultation Corners for Consumers" of the Daimaru and Matsuzakaya stores, consultants certified as advisory specialists for consumers' affairs accept comments from customers regarding product quality. Comments from customers are sent to Consumer Product End-Use Research Institute online for scientific quality inspection. Consultants inform customers of the results. These test results are also provided to relevant stores and manufacturers to prevent recurrence and improve quality.

- **"Consumer Product End-Use Research Institute" as a quality professional in the retail industry**

  Consumer Product End-Use Research Institute (the "Institute") operates in Osaka, Tokyo and Nagoya. Its operations include tests to identify product performance and the causes of complaints, the verification of product labels and expressions in sales promotion media under relevant laws and regulations, and consulting, trainings and seminars concerning product control in general.

  For the companies in the Group, the Institute conducts various tests to ensure the safety of products in use including quality tests of various products for sale, load bearing tests of wrapping paper and shopping bags and color fastness tests, as well as pre-sale tests, product label checks at stores and hygiene inspections of food floors and restaurants.

- **Creation of safe and secure store environment**

  At department stores and other stores and offices, we organize self-defense fighting teams and conduct emergency drills and BCP trainings* in preparation for earthquakes and fires. We also promote the improvement of systems by introducing an earthquake early warning alert system, a safety confirmation system for all employees and satellite-based mobile phones. Self-defense firefighting teams at stores carry out drills on a regular basis with the participation of all workers including people from suppliers to ensure that we can take prompt and appropriate actions including firefighting, evacuation guidance for customers and information collection. AED (automatic external defibrillator) units are installed mainly in department stores and we continuously train employees in their use.

  *BCP: A plan that allows an organization to continue to operate or restore business early in the event of disaster.

4 Social contribution activities with customers

J. Front Retailing continuously conducts social contribution activities with customers through business activities.

The unnecessary PET bottle caps collected mainly in the Daimaru and Matsuzakaya stores are recycled through the nonprofit organization "Re Lifestyle" and we donate the full amount paid for them to the authorized nonprofit organization "Japan Committee Vaccines for the World's Children" to fund vaccines for children around the world. Since we started this initiative in December 2009, the total amount donated through the collection of caps and other activities reached the equivalent of polio vaccines for 260,000 children in May 2018. Our other charity support activities include the "Pink Ribbon Campaign" and "Blue Clover Campaign" that promote early diagnosis, detection and treatment of breast cancer and prostate cancer, respectively, the "Table for Two" program that helps provide school meals for children in developing countries and support for people in the areas affected by the Great East Japan Earthquake, the Kumamoto Earthquake and other disasters.

**Major charity support in FY2017 (Daimaru Matsuzakaya Department Stores)**

Based on the recognition that the diversity of human resources is the source of corporate competitiveness, J. Front Retailing believes it is important to ensure as a company “non-discriminatory treatment” in terms of nationality, gender, thought, belief and even working conditions and maintain and improve it.

Work-life balance is important to keep employees healthy both mentally and physically and we aim to realize a workplace in which employees can work lively and achieve high productivity by creating a pleasant working environment and taking care of employees’ health.

Promoting women’s empowerment

Appointment of female leaders

Regardless of gender, we promote the assignment and use of human resources based on individual ability, performance, aptitude and motivation. At Daimaru Matsuzakaya Department Stores, women accounted for 32.5% of total leadership positions in March 2018. And three female Executive Officers serve as the Executive Store Managers of its flagship stores (21.4% of a total of 14 Executive Officers). We will actively appoint women to leadership positions and other important positions to further empower motivated women.

Mother Recruitment

Recently, while more and more women are entering into the workforce, they leave their jobs for childbirth at a high rate, which has become a social issue. We launched the “Mother Recruitment” program in fiscal year 2017 to hire experts who left their jobs for child care. Six people were hired by June 2018 and they are working for legal, finance, real estate and other divisions using their expertise and skills.

JFR Women’s School

We opened the “JFR Women’s School” in fiscal year 2018 for short-time workers of the Group who keep working while raising children. They aim to continuously enhance their career by acquiring time management and leadership skills, financial knowledge and others to perform at their best within a limited time.

Employment of disabled people

We recognize that the employment of people with disabilities is a corporate social responsibility and actively strive to promote that. “JFR Create” was established in April 2017 for the purpose of securing a stable working environment for disabled people and creating a workplace in which they can exercise their abilities and it was certified as a special subsidiary by the Health, Labor and Welfare Ministry in September 2017. The company was registered as an “Excellent Support Company for the Disabled in Osaka” for actively hiring and providing job assistance for disabled people.

Post-retirement reemployment program

In order to respond to changes in the social environment such as the rapid aging of the population amid extremely low birthrates and the raising of the age at which public pension payments begin and effectively use highly professional people, we adopt a reemployment program for employees who have reached the mandatory retirement age. The “My Life Plan Seminar” is held for employees aged 53 and over to help make their life after retirement rich and 316 employees attended the seminar in fiscal year 2017. Lecturers from inside and outside the Company provide information and advice on the future economic
design, healthcare, job satisfaction and purposes in life for employees before reaching the retirement age.

4 Promoting human rights education

We provide human rights education and strive to raise employees’ awareness of human rights from the perspective that individual employees should correctly recognize and understand human rights issues and that we should further promote the creation of corporate culture and corporate social responsibility based on respect for human rights. Daimaru Matsuzakaya Department Stores has a Human Rights Awareness Promotion Committee, which is chaired by the Executive General Manager of Human Resources Development Division. (The Committees in stores are chaired by their Executive Store Managers or Store Managers.) Its activities include human rights education through trainings when employees join the company and in-house seminars as well as various seminars organized by the governments and various educational materials distributed to employees.

5 Systems to realize work-life balance

Daimaru Matsuzakaya Department Stores has in place the following systems.

Systems related to child care and family care

Systems with coverage exceeding statutory limits are in place.

<table>

<td>Paid (Unpaid leave is permitted by law.)</td>
<td>31</td>
</tr>
</tbody>
</table>

Optional working hours system

We adopt a system that allows employees to choose shortened working hours for child care, family care, hobbies to enrich senior life and other reasons.

(Purpose and period: Up to the last day of the month in which the child enters a junior high school for child care, a period in which the employee needs to take care of his/her family member for family care, etc.)

Area Limited Employee System

In response to diversifying sense of working, values and lifestyles, we adopt the “Area Limited Employee System” to increase work options and build a foundation on which employees autonomously think of the balance between their career formation and life and act accordingly. Employees can choose their place of work from among five areas including Sapporo, Tokyo, Kansai, Chubu and Shizuoka.

6 Changing work styles

As a holding company, J. Front Retailing strives to change work styles so that employees can create something new. On the occasion of the relocation of the head office in January 2018, we reduced documents by approximately 80% and adopted a “free address system” that allows workers to freely choose their seats. We also promote paperless operations by digitalizing meetings, that is, “seeing meeting materials on a computer screen instead of printing them.”

7 Health care measures

Based on the basic idea that employees are the company’s greatest asset and that it is the most important of all things to keep employees healthy both mentally and physically in order to provide better services to customers, our specific health care measures focus on primary disease prevention.

To this end, we conduct health examinations to prevent lifestyle diseases and gynecological examinations for all employees aged 35 and over, as well as legal regular health examinations.* Dealing with mental health within the large framework of total mental and physical health care, we offer stress checks as a self-care tool. We put importance on health guidance provided by health care teams based on their results.

*In fiscal year 2017, 99.7% of the employees of Daimaru Matsuzakaya Department Stores had regular health examinations.

8 Labor-management relations

In Japan, the Labor Standards Act and other labor relations-related laws set forth basic rules regarding labor rights including employment opportunities, working hours and health and safety and require both labor and management to comply with them.

At each operating company in the Group, issues concerning working conditions and the improvement of economic status are resolved autonomously by labor and management in line with the actual situation of the unit labor union. J. Front Retailing and the Federation of J. Front Retailing Group Labor Unions hold the “JFR Labor-Management Meetings” to deepen the mutual understanding of labor and management and help operating companies in the Group develop smooth labor-management relations.

*In fiscal year 2017, 88.3% of the employees of Daimaru Matsuzakaya Department Stores belong to the labor union.
As a holding company, J. Front Retailing puts the strengthening of corporate governance at the top of its business agenda to ensure the legal compliance, transparency, objectivity and soundness of the business of the entire Group and focus on and thoroughly fulfill its accountability to its stakeholders (customers, shareholders, employees, business partners, local communities and others) as the core of the unified governance of the Group.

Transition to a Company with Three Committees (Nomination, Audit and Remuneration Committees)

The Company made the transition to a Company with Three Committees (Nomination, Audit and Remuneration Committees) through the resolution adopted at the Annual Shareholders Meeting in May 2017. The purpose of this change is to further strengthen corporate governance from the following standpoints.

(1) Strengthening of the management oversight function by separating oversight from execution
The Company will strengthen the oversight function for business execution of the Board of Directors by separating oversight from execution. In addition, the Company aims to promote sophistication of strategy by having the Board of Directors actively include the insights of external persons in order to hold rigorous discourse on important issues relating to the management of the Group.

(2) Greater clarity of authority and responsibility in business execution and promotion of agile management
The Company will enable decisions of business execution to be delegated to Executive Officers, clarify the authority and responsibility between the Board of Directors and Executive Officers and between the holding company and its operating subsidiaries, and carry out speedy management decision making.

(3) Improvement of transparency and objectivity of management
The Company will improve the transparency and objectivity of management by transitioning to a Company with Three Committees including Nomination, Audit and Remuneration Committees. The majority of the members of each committee are Outside Directors.

(4) Building of a globally applicable governance system
The Company will build a governance system that is easy to understand from global perspectives, such as those of overseas investors.

Overview of corporate governance system

The Company is a pure holding company and, with the exception of authority for important matters relating to the management of the Group, it delegates authority to its respective operating subsidiaries with respect to matters involving business execution by the operating subsidiaries in an effort to speed up business decisions and to make managerial responsibilities clear.

The roles and responsibilities of the Company, as a pure holding company, are as described below:
- Establishment of corporate governance practices for the entire Group;
- Planning and formulating of the Group Vision, the Group Medium-term Business Plan and the Group Management Policy and tracking of the progress and results thereof;
- Optimal allocation of the Group’s management resources;
- Establishment of the Group-wide risk management system and involvement in internal audits;
- Decision making on important matters involving business execution relating to the management of the Group; and
Board of Directors

(1) Basic roles and responsibilities of the Board of Directors

Directors who are elected by shareholders and are entrusted with the management of the Company are to carry out the following roles and responsibilities in the Board of Directors in accordance with their fiduciary responsibility and accountability to shareholders with the aim of realizing the Group Vision.

- Indicating the overall direction that the Group management is to take by engaging in constructive discussions with respect to the Group Vision, the Group Medium-term Business Plan, the Group Management Policy and other fundamental management policies and carrying out multifaceted and objective deliberations that include evaluation of risks with respect to the aforementioned;
- Appropriately making decisions in terms of overall policy and plans pertaining to the Group management on the basis of the direction noted above and overseeing the progress and results of the plans;
- Improving the environment to drive aggressive management toward discontinuous growth;
- Taking steps to build and develop internal control systems of the Group overall and otherwise overseeing the operational status of such systems;
- Overseeing conflicts of interest between related parties; and
- On the basis of summary reports furnished by the Nomination Committee, overseeing the progress of senior management team succession planning, personnel assignment plans pertaining to managerial talent and management team training, as delegated to the Nomination Committee.

(2) Composition of the Board of Directors

The Board of Directors of the Company is comprised of the appropriate number of 15 or less Directors as set forth in the Articles of Incorporation. The number of Directors is thirteen (five of whom are independent Outside Directors including two female Directors) as of May 24, 2018 and the term of office is one year.

From the standpoint of separating oversight from execution and enhancing the effectiveness of discussions at the Board of Directors meetings, one-third or more of Directors are independent Outside Directors and the majority of Directors are independent Outside Directors and internally promoted Directors who do not execute business.

When nominating Director candidates, the Company ensures diversity in consideration of the balance of knowledge, experience and ability on the Board of Directors as a whole.

With regard the agenda for discussion at the Board of Directors meetings concerning important policies related to the Group’s overall management, we deliberate in advance at the “Group Management Meetings,” which consists of Executive Officers and the Senior Executive General Managers of the supervisory units.

(3) Matters discussed at the Board of Directors meetings in fiscal year 2017

In fiscal year 2017, the Board of Directors had 14 meetings to deliberate and resolve the “dissemination of the Group Vision” and the “progress of the Medium-term Business Plan” as strategic discussion for the medium- to long-term growth of the Group, the “validation of the rationale for cross-shareholdings and sales of such shares” and a “basic policy to build internal control systems” as discussion concerning corporate governance, the “opening of Parco in the Daimaru Shinsaibashi store” and the “launch of the early childhood education” as discussion concerning individual growth businesses, the “transfer of shares of Forest,” the “sale of unused real
the standpoint of ensuring transparency and objectivity. The Remuneration Committee determines the policies on deciding the contents of individual remuneration of management personnel of the Company and Daimaru Matsuzakaya Department Stores and these contents themselves.

In fiscal year 2017, the Committee achieved an appropriate allocation between basic remuneration and performance-based remuneration (bonuses and stock-based remuneration) and also disclosed the performance indicators that will determine the level of stock-based remuneration in the Officer Remuneration Policy resolved on May 25, 2017. With respect to bonuses, which reflect the status of the achievements of individual officers, the Committee formulated a new performance evaluation sheet and has adopted it from fiscal year 2018 after reviewing evaluation items, performance indicators and the evaluation rank determination process so that results will be shown with greater fairness and objectivity. At the same time, entering into the first year when the Company’s shares are issued as remuneration, the Committee is working on the verification of the stock-based remuneration system for officers for appropriate operation as planned.

Governing Committee (optional advisory committee)

The Company, in principle, holds monthly meetings of the Governing Committee, an optional advisory committee comprised of the Chairperson of the Board of Directors, President and Representative Executive Officer, and all Outside Directors. The Governing Committee engages in constructive discussions and exchanges of views with respect to matters such as addressing issues to make the meetings of the Board of Directors more effective in view of the results of evaluation of the Board of Directors, and considering options with respect to organizational structure.

In fiscal year 2017, new personnel have been appointed as the presidents of three important associates (JFR Card, J. Front Design & Construction and Dimples’) in business areas with high management efficiency, and these presidents have also been concurrently appointed as the Executive Officers of the Company. This is because the Company has confirmed that the
**Appointment of Outside Directors**

The Company has appointed five independent Outside Directors out of 13 Directors to separate oversight from execution, ensure the effectiveness of the Board of Directors' discussions, and maintain and improve transparency and objectivity. In appointing Outside Directors, we confirm, in accordance with the Criteria for Determining Independence of Outside Directors set by the Company, that nominees are not susceptible to conflicts of interest with the Company’s shareholders and shareholders.

**Evaluation of the effectiveness of the Board of Directors**

Continued from 2016, the Company performed the third evaluation by third-party organization of the Board of Directors from July to September 2017, in line with the transition to a Company with Three Committees (Nomination, Audit and Remuneration Committees). The evaluation was performed using a methodology whereby the third-party organization prepared a report containing summaries and analyses of the results of “individual interviews” conducted for all Directors and “direct observation of the Board of Directors through attendance at its meetings” based on self-assessment by Directors concerning the progress of the evaluation items below and the Board of Directors carried out deliberations on the evaluation based on the report.

In light of the roles and responsibilities of the Board of Directors, an analysis/evaluation was performed for each of the items for evaluation, including the Board of Directors' composition and its operational status, agenda items, materials for deliberations, level of explanation for proposals, supporting system for Outside Directors, and the effectiveness of three Committees' (Nomination, Audit and Remuneration) activities. We set new questions each time to get answers according to their positions such as Inside Director, Outside Director, Committee Member and Non-Committee Member, as well as giving consideration to ensure comparability.

Evaluation results are shared between Directors and they discuss the solutions to the issues found from the evaluation to improve the effectiveness of the Board of Directors continuously. The evaluation of the Board of Directors conducted from July to September 2017 identified significant improvements compared to the previous evaluation regarding the level of the “Board of Directors’ contribution to the entire Group,” the “selection of appropriate agenda items and substantive discussions,” “each Director’s contribution to discussions” and other matters. The “enhancement of the corporate governance system through organizational structure changes” and the “level of each Committee’s contribution to the Board of Directors” were also highly evaluated. On the other hand, since there are opinions that there are still some problems remaining in the strengthening of execution (execution speed) to formulate the Group strategies expeditiously due to expectations toward further improving the effectiveness of the Board of Directors, the timing of implementing the solutions to the issues pointed out in the Board of Directors meetings and their contents are confirmed at the beginning of each meeting of the Board of Directors.

We are working on improvements including the strengthening of the organizational structure of Management Strategy Unit to promote “Multi Service Retailer strategy” and “ICT strategy toward the era of IoT,” which are the pillars of the Medium-term Business Plan started in fiscal year 2017. Since there are opinions demanding the improvement of execution planning and proposal ability, the Company has started to review discussion materials to improve the planning and proposal accuracy from shareholder viewpoints. The Company has also newly established the “Business Development Unit” that is responsible for completing the business portfolio reforms and achieving corporate value enhancement to strengthen execution and the “Human Resources Strategy Unit” that is responsible for preparing HR policies and further strengthening the promotion activities related to recruitment, assignment, cultivation and evaluation so that the growth of human resources, which are the most important management resources, can lead to the entire Group organization’s growth. The Company will continue to share issues based on the evaluation of the effectiveness of the Board of Directors to ensure the effectiveness of the entire Board of Directors.
To carry out the Medium-term Business Plan steadily for realizing the new Group Vision, the Company has formulated the new “Officer Remuneration Policy” including the introduction of a stock-based remuneration system for officers. The basic policies on the officer remuneration are as follows:

- Contributing to the sustainable growth of the Group and increasing corporate value over the medium to long term;
- A highly performance-based remuneration system that provides incentives to Executive Officers both for accomplishing objectives set under management strategies and business plans and for achieving targets with respect to corporate performance;
- Remuneration levels that can secure and retain personnel who have the “desirable managerial talent qualities” required by the Company;
- Increasing shared awareness of profits with shareholders and awareness of shareholder-focused management; and
- Enhanced transparency and objectivity in the remuneration determining process.

### Policy on determining remuneration for Directors and Executive Officers

To ensure that remuneration levels and remuneration amounts are appropriate and that their determination process is transparent, the determination of the specific remuneration amounts to be paid is made by discussion and resolution of the “Remuneration Committee,” which comprises a majority of independent Outside Directors and is chaired by an independent Outside Director. The Remuneration Committee meetings are to be held at least four times per year and the Company plans to conduct a review of the officer remuneration system upon the completion of the period of each Medium-term Business Plan.

### Basic remuneration

Basic remuneration is positioned as a fixed remuneration and is decided for each rank (position) based on the size (weight) of the responsibility borne by each officer.

### Procedures for determining remuneration for Directors and Executive Officers

To ensure that remuneration levels and remuneration amounts are appropriate and that their determination process is transparent, the determination of the specific remuneration amounts to be paid is made by discussion and resolution of the “Remuneration Committee,” which comprises a majority of independent Outside Directors and is chaired by an independent Outside Director. The Remuneration Committee meetings are to be held at least four times per year and the Company plans to conduct a review of the officer remuneration system upon the completion of the period of each Medium-term Business Plan.

**Note:** The remuneration composition for Directors and Executive Officers at Daimaru Matsuzakaya Department Stores is the same as that shown for “Executive Officers excluding President” in the figure above.
Succession planning

The selection and dismissal of the chief executive officer are the most important strategic decision-making and the Company positions the development and implementation of succession plans (for the next senior management team) as matters of particular importance in terms of management strategy.

The Company ensures clarity and transparency in the process of selecting successor candidates through repeated reviews of successor candidates’ individual evaluations based on assessments made by a third-party organization using internal data. The deliberations are conducted by the Nomination Committee and Remuneration Committee, in which Outside Directors comprise a majority. In the process of deciding a successor, the Board of Directors plays a supervisory role focused on realizing the Basic Mission Statement and the Group Vision, based on proposals received from the Nomination Committee. With regard to the qualities required of successors, the Company clearly defines the necessary values, capabilities, and behavioral traits in the form of the five qualities required of an officer in the Corporate Governance Guidelines under “Desirable qualities required of JFR Group managerial talent.” These are a “strategic mindset,” “reform-oriented leadership,” “tenacity to achieve results,” “organization development strengths” and “human resource development strengths.” The Company endeavors to ensure impartial cultivation and selection of successors by sharing these qualities among all members of the Nomination Committee to make them all aware of the indicators used in cultivating and assessing successors.

In addition, the dismissal of the chief executive officer is determined by the Board of Directors after being discussed and resolved by the Nomination Committee based on the goals set, expected and actual results (e.g. annual performance and strategy execution status), and the status of results, etc., achieved by successor candidates who are selected under the succession plan resolved by the Nomination Committee.

The Nomination Committee will continue to have discussions on succession planning in a planned manner so that changes in the environments and situations surrounding the Company, the progress of strategies formulated, etc., can be reflected in such planning.

Both the Committees mentioned above also discuss and resolve the dismissal of senior management team members as in the case of the chief executive officer.

Basic capital policy

The Company believes that any increase in free cash flows and improvement in ROE should help to ensure its sustainable growth and increase corporate value over the medium to long term. To such ends, the Company promotes a capital policy that takes a balanced approach to “undertaking strategic investment,” “enhancing shareholder returns” and “expanding net worth” being equipped to address risks.

Moreover, in procuring funds through interest-bearing debt, we aim to achieve an optimal structure of debt to equity in a manner cognizant of our funding efficiency and cost of capital, carried out on the basis of having taken into consideration our capacity for generating free cash flows and our balance of interest-bearing debt.

A “business strategy” where higher sales are accompanied by profits and a “finance strategy (encompassing the capital policy)” that heightens the rate of return on invested capital are essential elements with respect to improving free cash flows and ROE. In addition, we believe it is crucial that we maximize our operating profit and continually improve our operating margin by strengthening our core businesses and concentrating management resources on initiatives such as business field expansion and active development of new businesses.

Shareholder return policy

The Company’s basic policy is to appropriately return profits. Hence, while maintaining and enhancing its sound financial standing, the Company strives to provide stable dividends and target a consolidated dividend payout ratio of no less than 30%, taking profit levels, future capital investment, free cash flow trends and other such factors into consideration. The Company also gives consideration to the option of purchasing its own shares as appropriate, in accordance with aims that include improving capital efficiency and implementing a flexible capital policy.

Policy on cross-shareholdings

The Group reduces its cross-shareholdings as appropriate considering the market environment, share price trends and other such factors (cross-shareholdings are the holdings of listed shares other than those of subsidiaries and associates which are not held for pure investment purposes). However, this does not apply to shares with respect to which rationale for such holdings has been verified by means of validation as described below.

The Board of Directors validates the rationale for the Group to maintain its cross-shareholdings on a yearly basis from both qualitative and quantitative perspectives. From a qualitative perspective, the Board of Directors considers such business strategies as maintaining harmonious and favorable business relationships with corporate customers and business partners and securing supply chains, and from a quantitative perspective, it considers dividend income and other economic rationale.

Decisions with respect to voting on matters regarding cross-shareholdings are made from both of the perspectives of whether cross-shareholdings contribute to the sustainable growth of and the medium- to long-term enhancement of the corporate value of the company whose shares are held and whether the cross-shareholdings contribute to the Group’s sustainable growth and medium- to long-term enhancement of corporate value. Specifically, in regard to proposals that we consider to be of high priority with respect to strengthening corporate governance, such as proposals...
Improvement of Shareholders Meetings

With the aim of engaging in constructive dialogue with shareholders, we ensure that there is adequate time for our shareholders to consider matters with respect to which they will exercise their voting rights. To that end, we send convocation notices as early as possible (at least three weeks prior to the date on which a Shareholders Meeting is to be held) and at the same time we submit such content to financial instruments exchanges and post it on the Company’s website as early as practicably possible before sending out convocation notices. The convocation notice of the 11th Annual Shareholders Meeting was provided to financial instruments exchanges and made available on the Company’s website as early as possible (at least three weeks prior to the date of the Shareholders Meeting).

We give consideration to ensuring that our shareholders including domestic and overseas institutional investors are able to conveniently exercise their voting rights. To that end, we have adopted online and other means of exercising voting rights and otherwise use an electronic platform for exercising voting rights. We also prepare English translations of our convocation notices and make them available on our website and the Electronic Voting Platform so that our overseas shareholders are able to properly exercise their voting rights.

For many shareholders, the venue of the Shareholders Meetings was moved further away from their residences compared to the times when they had been the shareholders of Daimaru and Matsuzakaya before J. Front Retailing was established as a holding company. Therefore, in order to provide them with opportunities to view the Meetings, we have set up live relay venues in the Osaka area (the Daimaru Shinsaibashi store) and the Nagoya area (the Matsuzakaya Nagoya store).

Participation of beneficial shareholders in Shareholders Meetings

Respecting the requirements of the Corporate Governance Code, at the 10th Annual Shareholders Meeting held in May 2017, the Company amended the Articles of Incorporation to enable an institutional investor that owns shares in the name of a trust bank, etc. and does not own shares in their own name to attend a Shareholders Meeting and exercise voting rights as a proxy.

There were no special requests filed by beneficial shareholders at the 11th Annual Shareholders Meeting.

Disclosure and IR activities

Under the Basic Mission Statement that “we aim at developing the Group by contributing to society at large as a fair and reliable corporation,” the Company promotes IR activities for the purpose of maintaining and developing relations of trust with stakeholders including shareholders and investors. By accurately and plainly disclosing important information about the Company in a fair, timely and appropriate manner, we promote IR activities with the aim of improving management transparency and helping stakeholders better understand the Company.

The Company discloses important company information to which the timely disclosure rules apply through the TNet (Timely Disclosure Network) system provided by the Tokyo Stock Exchange, while posting the same information on the Company’s website, etc. as quickly as possible. With respect to any information that is deemed to help stakeholders better understand the Company, even where the timely disclosure rules do not apply to it, the Company works to publicize such information on its website as well as by using SNS and publishing integrated reports. The Company releases information in a timely and appropriate manner by making use of the TNet and EDINET platforms, the Company’s website and other means in line with the attributes of the information being disclosed. Moreover, to ensure that we disclose information in an impartial manner, we prepare and release English translations of our convocation notices of the Shareholders Meetings, integrated reports, timely disclosure information, financial information and the Company’s website.

The Company’s efforts to improve communication include timely disclosure and information transmission on its website in combination with various briefings and meetings and responses to inquiries from shareholders and investors on a daily basis. The comments and requests received from shareholders and investors are widely shared among the Company and the shareholders.
relevant companies in the Group, and we refer to them in managing the Company to increase corporate value.

Furthermore, the Company was chosen as No. 1 in the retail category of the “2017 Award for Excellence in Corporate Disclosure” (sponsored by The Securities Analysts Association of Japan). Its evaluation items include: (1) top management attitude, the function of IR department and the basic stance on IR; (2) information disclosure in briefings, interviews and description materials; (3) fair disclosure; (4) disclosure of information on corporate governance; and (5) voluntary information disclosure in line with the situation of each industry. The Company was highly evaluated, selected as No. 1 in two items out of five, and as the overall No.1 in the retail category among 20 retail companies.

The Company has established the “Compliance Committee” (whose membership includes a corporate lawyer) for the purpose of appropriately addressing the issues of the Group compliance management practices. The Committee draws up a policy for addressing matters involving serious compliance-related violations, continuously oversees development of the foundations of compliance system (e.g. preparation of promotion systems and plans) and the status of implementation through close collaboration with departments in charge of promoting compliance and promotes compliance with laws and regulations, corporate ethics and other such standards. Both the Committees report details of their deliberations to the Audit Committee regularly (about two times a year) and in a timely manner.

Whistleblowing system

The Company has established a whistleblowing system that enables all the Group’s officers and employees as well as all individuals working at the Group (including part-timers and employees seconded from business partners) to notify the Compliance Committee directly with respect to compliance-related issues, and to seek corrective action. The Company has set up points of contact for whistleblowers both internally and outside the Company (a corporate lawyer).

The Group’s internal company rules rigorously provide for the whistleblowing system in terms of protecting the confidentiality of whistleblowers and prohibiting any disadvantageous treatment of any whistleblower.

*There were 28 whistleblowing cases in fiscal year 2017.

Combining the above and individual meetings, we held a total of 287 dialogues with analysts and institutional investors.

From the standpoint of fair disclosure, we release the Japanese and English texts of the summary of questions and answers in the results presentations and conference calls held after the release of financial results beginning in the fiscal year ended February 28, 2018.

**Risk management and compliance**

The Risk Management Committee manages and addresses strategic and other risks as a whole systematically from a company-wide perspective, and makes management decisions specifically focusing on risk management. The Committee is chaired by President and Representative Executive Officer and the Committee members include the Senior Executive General Managers of the supervisory units and the presidents of main subsidiaries. The Committee assesses a variety of risks, prepares necessary measures, and conducts progress management, etc. using extensive specialized knowledge of the Committee members chosen from among the supervisory units.

The Company has established the “Compliance Committee” (whose membership includes a corporate lawyer) for the purpose of appropriately addressing the issues of the Group compliance management practices. The Committee draws up a policy for addressing matters involving serious compliance-related violations, continuously oversees development of the foundations of compliance system (e.g. preparation of promotion systems and plans) and the status of implementation through close collaboration with departments in charge of promoting compliance and promotes compliance with laws and regulations, corporate ethics and other such standards.

Both the Committees report details of their deliberations to the Audit Committee regularly (about two times a year) and in a timely manner.
The Company’s governance initiatives

When I became the Company’s Audit & Supervisory Board Member three years ago, people were talking about the importance of outside officers and corporate governance. In such a situation, the Company, which was a Company with an Audit & Supervisory Board, established a voluntary “Governance Committee.” And the Company discussed the way the organizational structure should be. As a result, the direction that it should transition to a Company with Three Committees (Nomination, Audit and Remuneration Committees) was shown.

I think there are three points of changes in the Company’s governance. Firstly, they have promoted initiatives to ensure the effectiveness of the Board of Directors as a whole. Secondly, they introduced the International Financial Reporting Standards (IFRS) and B/S-based management from the standpoint of governance in a broad sense. It is particularly symbolic that they have set an ROE target of 8% or more in the recent and current Medium-term Business Plans. And thirdly, they created a specialized unit named “ESG Promotion Division” in March 2018 to clarify their stance on important sustainability issues. I think these three points are great changes that represent the development of the Company’s governance.

In addition, I feel the Group structure is changing. For example, they discussed the roles of the auditors of consolidated subsidiaries. I think studying such a thing itself is a specific example of proceeding with the Group management. Their view is that it is not easy to survive in the future without considering new businesses and associated businesses other than the Department Store Business beyond the framework of retail and aiming to change their business portfolio. Business portfolio was actively discussed at my previous company, and as a result, they pulled out of associated businesses one after another to focus on their main business. Meanwhile, given the industry structure, I think it will be difficult for the Company to focus excessively on retail in the future. Though I think the Company’s direction and idea of “exceeding the framework of retail” is correct, the questions are what business to choose and where to expand it.
Changes seen in the Board of Directors

Compared to my first year as an outside Board member, I think the Company’s policies and strategies are much more intensively discussed at the Board of Directors meetings. The Board members including myself discussed in depth the Group Vision, the Medium-term Business Plans, annual strategies and others. It was striking that the Company ran into issues concerning “people” such as the development and securing of human resources in any discussions. Each strategy is not a “pie in the sky” and it is important to realize it. Another keyword for realizing strategies is “speed.” In discussions on strategies, issues of “people” and “speed” were always raised.

The Company evaluated the Board of Directors three times. Seeing the results, I feel the evaluations were generally correct. Inside Directors also told what they really thought more than I had thought. The results of the evaluation of the Board of Directors are not its purpose but what to do thereafter based on issues seen from the evaluation is important. Evaluation results are only interim evaluation at that point in major governance reform and it is important to continuously conduct evaluations. Currently the Board of Directors of the holding company is evaluated and I think the evaluation should be expanded in the future to cover major consolidated subsidiaries partly in order to deepen discussions on the Group management.

The main item on the agenda of the meetings of the voluntarily established Governance Committee is the way the organizational structure should be to improve effectiveness based on the evaluation of the Board of Directors. In the past, the Committee discussed the members of the Board of Directors, agenda items to be discussed, time allocation, the number of the Board meetings, etc. Presently, the Committee discusses even the way related operating subsidiaries and their roles and functions and audit systems should be as well as the functions and roles of the holding company. I feel the Governance Committee has also entered the second phase.

In general, diversity is considered as the issue of women, nationality and race, and age. However, I think diversity is the issue of how to use people with different thoughts as well as genders, nationalities and ages. I think the final form of diversity is to use the individuality of each and every worker, regardless of whether he/she is an officer or an employee, instead of excluding people who think differently, so that people with different thoughts can perform well in a company. As discussed with Mr. Yamamoto, President, previously, it is important to create an environment where consolidated subsidiaries can easily provide advice to the holding company. I think openness to accept different opinions is critical to enhance corporate value.

Roles to be filled as Outside Director

I think people with different insights and experiences in different industries should be appointed as Outside Directors. I am conscious of an external perspective as well as the standpoint of a representative of shareholders. I think to say consciously in the position of Outside Director what is difficult to ask or say in the position of Inside Director helps improve corporate value and actually I am doing so. I think it is important to improve the executive level first in a company. If only Outside Directors are strong and Executive Officers are not strong, the company will become an armchair theorist. I exercise oversight and provide advice consciously so that the executive level will be improved.

In such a situation, I think it is good that the “Risk Management Committee” focuses on the both positive and negative sides of risk. Literally, there is a “risk of not investing.” The Company has many things to consider including ICT and e-commerce, M&A, and new businesses. Japan as a whole will trend toward depopulation and market shrinkage in the future. They are the issues facing not only the Company but also all industries in Japan. However, I think the Company should make a little more effort to address these issues.

I think the Company put in place an internal control system and formulated the great Medium-term Business Plan during the past year. Going forward, it is important how they will be operated and promoted, and to this end, I would like to thoroughly fulfill my supervisory role. It is also important how the policy and direction of the entire Group Management will be established beyond the framework of retail. Currently the Company is at a major “turning point” and in the very phase of changing the Group structure. How will the Company proceed with these changes? I would like to look at the future of the Group management from the standpoint of the business plan, development of new businesses and overseas business management, in which I had engaged over my career.

I think the Company is in the course of very interesting change now. For example, the business concept of the present pharmaceutical companies has changed completely from before. They are a so-called “information industry” in which it is important not to sell products but to input and output information. In these circumstances, the perspective of how to use data is becoming important. Though there may be ways of doing business continuing for hundreds of years in the retail industry, I think some of them can be changed. A keyword “creation” is shown in the new Group Vision and I give attention to how the Company will become a “creative company” in the future. For example, it may be interesting to aim for a “research-and-development-based retailer.” I expect the Company will produce tangible results that meet the keyword “creation” in the Vision.

### Corporate profile

**Company name:** J. Front Retailing Co., Ltd.

- **Main store:** 10-1, Ginza 6-chome, Chuo-ku, Tokyo
- **Office:** Nihonbash 1-chome Mitsui Building, 4-1, Nihonbash 1-chome, Chuo-ku, Tokyo
- **Established:** September 3, 2007
- **Capital:** ¥31,974 million

The Group’s business lines:
- Department store operation; retail; restaurants; wholesale; import and export; design, supervision and contracting of construction works; direct marketing; credit cards; labor dispatch service; merchandise inspection and consulting; and others

Number of employees (consolidated): 6,723 (as of February 28, 2018)

Note: In addition to the above, there are 1,573 dedicated employees who became indefinite-term employees on June 1, 2017 and 2,033 fixed-term employees on average during fiscal year 2017.

**U R L:** http://www.j-front-retailing.com/
Financial/Non-financial Highlights

Consolidated ROE

7.5%

In the fiscal year ended February 28, 2018, return on equity (ROE) as the most important management indicator was 7.5% due to the efforts to enhance profit level and capital efficiency. We aim to achieve an 8% or more ROE in FY2021, the final year of the new Medium-term Business Plan.

Customer traffic

340 million people

About 340 million customers visited 15 stores directly managed by Daimaru Matsuzakaya Department Stores and 18 Parco stores during the year. This shows that our stores are loved by and familiar to local people and contribute to revitalizing local communities. (As of February 28, 2018)

Annual dividend

7th consecutive year of increase

Our basic policy is to maintain stable dividend payments and appropriately return profits targeting a dividend payout ratio of at least 30% in view of profit level, future capital investment, FCF trends, etc. while maintaining and enhancing the sound financial condition.

Identifiable customers of Daimaru/Matsuzakaya/Parco

6 million people

As of February 28, 2018, Daimaru Matsuzakaya Department Stores and Parco have 4.2 million and 1.88 million cardholders, respectively, totaling more than six million. We also have a gaisho organization of affluent customers and such good customer assets are the strength of the Group.

Share of sales to inbound tourists

7.3%

In fiscal year 2017, Daimaru Matsuzakaya Department Stores posted tax-free sales to foreign tourists to Japan of ¥47.9 billion and their sales share increased to 7.3%. The product selection and hospitality of our department stores attract foreign tourists and sales continue to grow.

New employees in FY2017
In fiscal year 2017, Daimaru Matsuzakaya Department Stores emitted 147,000 tons of CO2, down 6.4% in intensity compared to fiscal year 2016. We promote conversion to LED lighting at stores and make various energy saving efforts in back-office sections to contribute to preventing global warming and improve productivity at the same time.

Daimaru Matsuzakaya Department Stores launched “Ecoff” recycling campaign in August 2016. The number of disused clothing, shoes and bags brought by customers finally exceeded one million pieces in total till April 2018. The collected items are recycled as energy, fabric and others.

- Parco Business: 23.7%
- Other: 8.6%
- Credit and Finance Business: 5.5%
- Real Estate Business: 8.3%

Operating profit: ¥49.5 billion (IFRS)

Consolidated ROE: 7.5%

Consolidated ROA: 4.9%

Consolidated operating margin: 10.5%

EPS: ¥108.92

Consolidated dividend payout ratio: 32.1%

Equity ratio: 38.7%

Illustration Comparison between JGAAP and IFRS (International Financial Reporting Standards)

Greatly decrease because sales of the Department Store Business from purchase recorded at the time of sales (shoka shiire), tenant sales of the Parco Business and sales of Daimaru Kogyo from shoka shiire are presented net.

Point expenses included in SGA of the Department Store Business are deducted from sales.

Actuarial differences in goodwill and retirement benefits are not amortized.

Gain on sales of non-current assets, miscellaneous income, loss on disposal of non-current assets, miscellaneous expenses, etc.

Interest income, dividend income, interest expenses, etc.

There is no “ordinary profit” under IFRS.

Corresponds to profit under JGAAP and is used in the numerator of ROE.
Sales revenue and operating profit

- The percentage of total sales revenue represents the ratio of sales revenue to external customers after eliminating intersegment transactions.
- Sales revenue and operating profit include intersegment transactions.

**Daimaru, Matsuzakaya and Parco Cover Major Big Cities across Japan**

J. Front Retailing Group operates stores in major cities across Japan, from Hokkaido in the north to Kumamoto, Kyushu in the south. The Department Store Business operates 17 “Daimaru” and “Matsuzakaya” stores. The Parco Business operates 18 “Parco” shopping complexes*. We also operate “Ginza Six” and nine “Zero Gate” stores in a new business format which develops urban-style low- to medium-rise shopping complexes.

The Group will make the best use of the well-balanced network of store assets in major cities throughout Japan and accelerate new store opening and development strategies for further growth.

*Including Shibuya Parco, which is temporarily closed for rebuilding
